8050 Zurich
Switzerland

The IoT platform at the heart of your smart solution

akenza is the self-service IoT platform allowing you to build great IoT products and services with value. It **connects**, **controls**, and **manages** IoT devices, all in one place. akenza enables organizations of all sizes build their smart solutions on a solid technological foundation, staying agnostic and without reinventing the IoT wheel.

The low-code features and smooth onboarding minimize the efforts to connect devices to the cloud so that you can focus on what really matters: the rapid introduction of innovative IoT solutions.

Launch your IoT project in minutes instead of hours.

Why akenza?

Centralized connectivity management & integrations to numerous connectivity providers

No-code data flow to define the data processing chain with pre-integrated device types

Rule engine to trigger actions based on your sensor data

Multiple output connectors to data sinks & notification services

"With the akenza platform, we have one central cockpit and save up to 4 additional steps for registration and maintenance of the connectivity of one device. That's only one reason why we chose akenza – because IoT can be so simple."

Roger Gygli, Head of Digital Transformation, ISS Switzerland
