

HIVE ADVISORY SERVICES - PRE-EVENT VALIDATION

Teams Town Hall pre-event validation

This service includes a white-glove engagement focused on testing and analyzing your live video infrastructure to ensure it can support Teams Town Hall events effectively. It offers pre-event testing and comprehensive assessments to identify potential weaknesses within your video delivery chain.

About the Advisory Service:

This engagement will provide your organization with a capability analysis of your live video infrastructure. Together with your IT and network functions, we will test Teams Town Hall with the supporting IT infrastructure. We will then assess how your current technical capabilities can deliver against the live event KPIs and desired business outcomes that you have specified. If potential weaknesses are uncovered, we will provide recommended actions to address the issues.

Advisory Service outcomes:

1. An event readiness analysis tailored to your specific needs

2. Detailed insights into the capabilities and limitations of your IT infrastructure

3. Concrete recommendations for necessary improvements

Service best suited for: IT and Network Managers

Agenda | 8 hours:

- Silent Testing plan & setup
- Running 1-3 Hive Silent Tests
- Workshop to analyze collected data

Requirements

- Hive Silent Testing

How to get started:

Email us at advisory@hivestreaming.com and we'll coordinate with your IT stakeholders to set up testing and conduct infrastructure assessments. The engagement will be conducted virtually, including via Microsoft Teams video meetings.
