

HKT Microsoft 365 Copilot Assessment

Learn how to work smarter, safer, and better with Microsoft 365 Copilot, an AI-powered tool that integrates seamlessly with your Microsoft 365 apps. In this workshop, you will discover how Microsoft 365 Copilot can help you create, communicate, and collaborate more effectively and efficiently. You will also learn how Microsoft 365 Copilot respects your data privacy and security, and how it follows the principles of responsible AI. The workshop will cover the following topics:

Accelerate Success with HKT Microsoft 365 Copilot Assessment

Assess

We will review your current tenant setup, source data, and readiness for Microsoft 365 Copilot. We will also provide a gap analysis, a readiness scorecard, and technical guidance for optimal performance.

Art of the Possible

We'll showcase how Microsoft 365 Copilot can empower your organization as an AI-driven powerhouse. Learn about responsible AI principles and witness how Copilot adheres to them. Experience the full range of features, capabilities, and live demos. Let us guide you in identifying the most valuable scenarios tailored to your unique business needs.

Build the Plan

We'll support you in prioritizing and planning the implementation of Microsoft 365 Copilot for your selected scenarios. Our team provides skill enablement, change planning, and adoption guidance. You'll receive a detailed report with actionable recommendations for your next steps.

AI
