

Active Directory Self Service Portal

Revolutionary tool for AD Administration

What is AD Self Service Portal?

AD Self Serve portal is a revolutionary web application that helps System/ Domain administrators by taking off burden of tedious tasks like changing of passwords, updating user profiles, unlocking accounts etc. by providing self-serve web GUI (Graphical User Interface) to the ordinary AD Users.

It also gives the administrators ability to see a graphical representation of the changes made by each AD User in the form of bar charts and pie charts respectively.

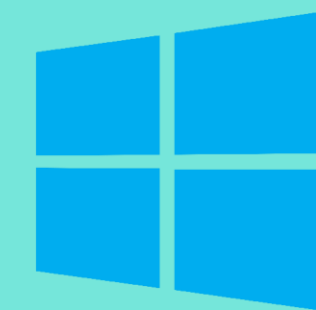

Why to use this Product?

- Improved Employee Productivity
- Personal data confidentiality
- Empowering end-user
- Update customers data in real time
