Copilot for Microsoft 365: Readiness Engagement

Copilot for Microsoft 365 is a revolutionary AI-powered assistant that helps you create, communicate, and collaborate more effectively. It can generate high-quality content, summarise information, suggest actions, and enhance your skills across Microsoft 365 apps. Copilot for Microsoft 365 is grounded in your organisation's data and context and follows responsible AI principles to ensure trust and privacy.
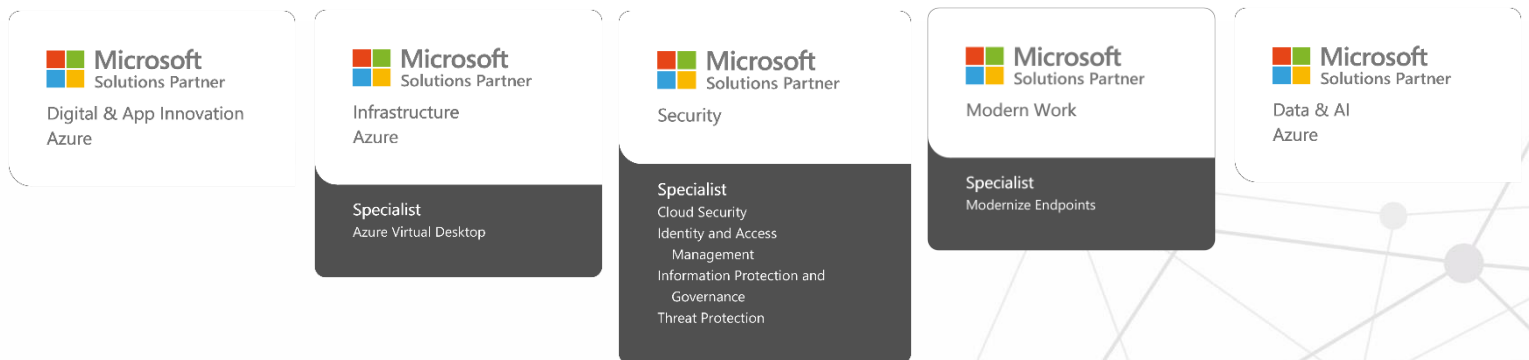

Organisations are quite rightly excited to get started; but how can you ensure you're in the best possible position to adopt such a powerful tool? Adopting Copilot successfully requires proper planning, enablement and readiness to maximise investment, and reduce its time to value. We're well versed in the crucial role that data governance plays in AI adoption, as well as the importance of building (and maintaining) a robust security posture as the foundation for successful AI implementation, focusing on identity protection and compliance.

During a Copilot Readiness engagement, **we will assess data availability and quality, and address data privacy and security**. Using Microsoft and HTG's comprehensive security strategy built on the principles of Zero Trust, we will provide and implement a robust set of recommendations for enhancing your security posture ahead of a Copilot deployment.

Why HTG?

We're a Microsoft FastTrack Ready Partner, recognised for being in the top 1% of partners performing globally, with a track record for success across Modern Work & Security.
