

Security Copilot Plug In for WXP

HP Workforce Experience

Platform (WXP) now integrates with Microsoft Security Copilot, combining HP's fleet management and employee engagement capabilities with a generative AI-powered assistant for security and IT.

The Security Copilot Plug In for WXP:

- Enhances device and security management
- Enables customers to expand visibility over their device fleets and reduce employee downtime

Visibility & Insights

Warranty Assessment

to quickly identify devices nearing the end of their warranty period

Windows 11 Readiness Check

to evaluate which devices meet upgrade requirements

Resource Consumption Check

to monitor CPU, memory, and disk usage to optimize performance
