# Intelligent Security for the Modern Workplace

Microsoft Intelligent Security cuts through the complexity, empowers security teams, and delivers friction free user experiences

WHY HPT

Microsoft Partner Level

- Cloud Solution Provider 1-Tier
- Gold Partner
- National System Integrator (NSI)
- Licensing Solution Provider (LSP)

Awards

- Outstanding performance
- Country Partner of The Year

Begin your Intelligent Security journey in the Modern Workplace

The growth of organizations requires IT systems also need to be scaled, this leads the cybersecurity and information security risks to businesses.

Realizing these risks will affect to the expansion and evolution of businesses, HPT offers the best security solutions to help organizations secure the IT environment from cyber risks and prevent information security threats on the cloud adoption journey. HPT solutions provide the protection for user identities, endpoint devices, from PC/laptop to smartphones, and even from Microsoft cloud to other 3rd-party SaaS applications integrated to IT environment of businesses.

HPT partnering with Microsoft delivers a comprehensive solution to help businesses to be productive, always stay secured, and empower their employees to achieve more.

Secure your Digital Workspace with HPT Solutions

HPT provides a comprehensive security solution based on Microsoft technology through many different services:

- Consulting Service: advise customer on the optimal technology solutions that fit their current IT environment state.

- Deployment Service: implement or integrate new technology into customer IT environment.

- Upgrade Service: help customer to level up their current IT system.

- Incident Troubleshooting and Response Service: identify and isolate the affected range of incident timely, tackle the incident thoroughly, quickly recover IT system and turn it into production as soon as possible, investigate the root cause of incident.

- Managed Service: an HPT exclusive service to monitor and handle incident on behalf of customers in 24x7x365.

Service Scope

- Identity and Access Management
- Authentication solutions
- Identity Governance
- Privileged Access Management
- Endpoint Detection and Response
- Endpoint Protection Platform
- Threat Vulnerability Management (TVM)
- Threat Intelligence
- Email Security Gateway
- User and Entity Behavior Analytics
- Incident Response services
- Security Assessment
- Application Control
- Mobile Devices and Applications Management
- Data Protection
- Information and Messaging Encryption
- Data Loss Prevention
- Device Encryption
- Cloud Access Security Broker
- Cloud Workload Protection Platform
- Cloud Security Posture Management

Customer Benefits

- Built-in experiences across platforms
- AI and Automation to secure your future
- Best in class and integrated
