

COURSE DESCRIPTION:

Learn the basic skills for working with Power Apps, the low-code platform from Microsoft, within one day using a sample app! After this training, you will be familiar with most of the functions of Power Apps as well as Power Automate.

FORMAT:

2 Days / each 4 Hours

AGENDA:

- Presentation of the concept of the Microsoft Power Platform
- Collaborative development of a business app without the need for programming
- Creating a workflow with Power Automate

MAX. NUMBER OF PARTICIPANTS:

10 people

TARGET:

Soon you will be able to create individual business apps with any programming effort! We will teach you the basics of all important functions and connectors. At the end of this training you will be able to digitalise business processes, automate workflows and link new apps with various data sources. This will enable you to implement complex scenarios and make your own apps available to colleagues - securely, compliantly and scalable.
