

Mitigate Compliance & Privacy Risks

As your business-critical data expands and your workforce shifts to remote work, having an integrated approach that can help quickly identify, triage, and act on risky insider user activity is more important than ever.

Workshop Highlights

Uncover hidden insider and privacy risks in your environment

Monitor user behavior and communications for risky behavior

Assess your environment against key data protection standards

Receive an analysis and report on findings and associated risks

Learn about tools and services that can mitigate risks

Explore recommendations and next steps

93%

of organizations are concerned about insider risks. 1

For the majority of organizations, external cybersecurity risks have been top of mind for many years. But these organizations are now considering the risks posed by trusted insiders as an equal or even bigger threat. Organizations are beginning to recognize the importance of establishing controls that enable them to quickly identify and manage insider risks.

INTELLIGENTLY INVESTIGATE AND TAKE ACTION ON INSIDER AND PRIVACY RISKS

Detect, investigate, and act on malicious and inadvertent activities in your organization is critical to ensuring trust, creating a safe workplace and protecting company assets and employee and customer privacy.

The Mitigate Compliance & Privacy Risks Workshop gives you the insights you need to understand insider and privacy risks in your organization.

Why You Should Attend

By attending this workshop, our experts will work with you to:

Document your objectives and strategy around insider and privacy risks.

Show how to detect, investigate and take action on insider and privacy risks.

Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies **Provide** actionable next steps based on your needs and objectives

¹Insider Risk Management Microsoft Market Research January 2021

Workshop Objectives

The User Risk Check is the core activity of the Manage and Investigate Risk Workshop. The activity is spread out over several weeks to allow time to run on top of your cloud infrastructure and discover and identify insider and privacy risks in your organization. User Risk Check leverages automated Microsoft 365 tools and services to monitor user behavior and communication to discover inadvertent or malicious behavior that can impose risk to your organization.

We'll customize the workshop based on your organization's needs
