Envision what your future ERP should be able to do

Our experts are here to help you solve key challenges such as:

- Build Agile Business Processes

- Build a Resilient Supply Chain

- Generate Proactive Insights for Customers, Employees, Logistics, and Financials

- Establish a Modern Finance Department, Manage Financial Risk

- Launch + Manage new Services like Subscriptions or Usage-based Billing

- Plan, Deliver, Bill, Control complex Projects

My Business Applications need a reset – but where to start?

There are usually many drivers and aspects behind the need for an ERP Modernization:

Strategy – Your digital agenda includes the launch of new offerings, but you are lacking certain functionality or facing regulatory demands.

Transformation – The new system should eliminate process friction. You see the need to become more data-driven, to establish a connected workforce with automation where possible.

Cloud – You need to understand the impact of Enterprise Cloud Architecture to your Business Application landscape and the related integration scenarios.

Delivery – Are you discussing what "agile" means to you, which future skill sets you need, and what your future ERP partner should bring to the table?

How HSO can help

We can be your guide in this upcoming journey. Together with you, we envision a modernized ERP solution that helps your business compete and win new customers.

Our approach brings all relevant aspects into one structure. We combine your digital game plan with the ERP reality.

HSO has decades of experience in managing large, international ERP implementations. Our teams combine the industry know-how, latest Microsoft technology, and Modern Delivery capabilities.

HSO Envisioning ERP Modernization

How to get started on your (Cloud) ERP journey

Inspire
Imagine a future state ERP solution for your business

Envisioning Workshop
(1-2 days)

Use design thinking - a proven problem-solving process - to organize great ideas through creative and critical thinking exercises. With this workshop, we will address:

- Key Drivers and their impact to your ERP Modernization roadmap
- Major process enhancements
- Change Management considerations

Design
Discover what's possible by aligning technology to business goals

Solution Assessment
(3-5 days)

Analyze what's feasible – whether it is about an expansion of your current business application landscape or a greenfield approach, it´s about how technology will affect your objectives. Our technical analysis will cover:

- High-Level Target Architecture
- Integration Scenarios
- Dynamics 365 standard versus Partner solutions

Empower
Empower others in your organization to see the value

Visual solution demonstration
(1 day)

Share demo or video assets across your organization to increase alignment and enthusiasm for the value of your ERP transformation.

Based on 1 defined process, your will get a feeling about working with Dynamics 365 and how it integrates with your Modern Workplace.

The *Envisioning Workshop* aligns the team around the overall project drivers and business goals.

The *Solution Assessment* takes a high-level view on Dynamics 365 and other components, including Power Apps, Power BI, Partner solutions, and how they best integrate with your existing environment. As a result, we will provide you with a clear, actionable picture of how we can help you reach your ERP project goals.

The *Solution Demonstration* shows a relevant business use case to your project stakeholders.

Starting off, we go through an Analysis phase, where we cover and discuss the entire set of project dimensions.

This gives us the basis to determine timeline, resources and budget. Contact us today!
