

# Windows Server Migration Accelerator:

The optimal solution for Window Server EOL and end-of-support

## About HSO:

As a Microsoft Azure Expert MSP, you can be confident that you are connecting with one of the most capable Azure Managed Service Providers. Whether we are working on mission-critical apps, entire data center footprints, or hybrid environments, we have the proven capabilities to be able to help you.

## What we offer

Windows Server 2012 and 2012 R2 have reached End of Support (EOS), which means that these products will no longer receive security updates, non-security updates, bug fixes, or technical support from Microsoft.

This puts your business, data, applications, and infrastructure at risk from security vulnerabilities and regulatory non-compliance.

## How can we help?

By moving your systems to Microsoft Azure, Microsoft will provide Extended Security Updates (ESU) free of charge, for 3 years for customers moving their systems to Azure.

Let us support your workload migration into Azure and unlock ESU using our years of expertise and defined migration process.

## Next steps

Sign up to the HSO Migration Accelerator

If you need your Windows Server 2012 workloads to keep being supported and remain in compliance, our Migration Accelerator can help you:

- Migrate your workloads into Azure quickly and securely
- Benefit from three years of free extended security updates
