

AI adoption worldwide has increased dramatically

- In only one year, organizations reached 72% adoption of AI tools (+17pts YoY)
- Frequent users almost doubled YoY (from 14% to 26%)
- 20% of organizations are planning to invest more than 15% of their digital budgets in gen AI and analytical AI.

But companies are still struggle to find the optimal solution to meet you needs & requirements

Beyond the Hype: Why ChatGPT & Copilot may not meet your real-world needs

OpenAI ChatGPT app

Great from consumers but lower efficiency for daily Office tasks. Few reasons:

- **Low Efficiency:** Limited synergy with Office tasks, creating workflow hurdles.
- **Cost:** At \$30/user, organization-wide rollout strains budgets.
- **Privacy & GDPR:** U.S.-based data handling and third-party sharing spark concerns.
- **Customization:** Tailoring often requires repetitive prompt engineering.
- **Expertise:** Consistent, accurate results demand advanced prompt engineering skills.

Microsoft Office Copilot

Reliable for some predefined everyday tasks but falls short on advanced needs. Here's why:

- **Efficiency:** Not ideal for complex workflows, handles routine tasks.
- **Capabilities:** Limited to Office apps, basic AI engines, and few languages.
- **Cost:** \$30/user, making large-scale adoption costly.
- **Privacy/GDPR:** Data mostly processed in the EU, but there are exceptions.
- **Customization:** Integrating external sources is restricted.
- **Security:** Requires strong Data Governance due to Office integration.
- **Training:** Users must learn specific commands and settings.
- **Vendor Lock-In:** Dependency on Microsoft ecosystem reduces flexibility.

But we believe there is a solution that is better adapted to your need!

Meet AI4Business

AI4Business: Features & modules

AI4Business is a set of AI assistants **embedded in your daily Office apps** (like Outlook, Word, web, and other), that help user to perform their tasks faster, better & cost-efficient. The solutions includes many predefined actions and **support custom AI processes**, specific to each role, team or company.

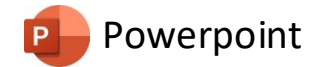

Web

- AI Agents
- AI Researcher for Online
- Choose your preferred AI engines
- Attached files & process them using AI
- Chat can search on Sharepoint, Onedrive, Exchange mail and Google
- Image generation
- Interact with external platform directly in Chat (via APIs)
- Support Custom AI processes

Outlook

- Outlook Addin
- Sumarize long mails & attachments
- Write draft answers
- Set meeting
- Contact details

Powerpoint

- Powerpoint addin
- Creates new presentations
- Search and generate images
- Writes the speech
- 15+ AI assisted functionalities

Word

- Word addin
- Writes documents based on templates or in a new style
- 20+ AI assisted functionalities

Excel

- Excel addin
- 30+ AI assisted functionalities
- Unlimited data AI processing
- Use external data such as files, SharePoint or Google

AI4Business vs. ChatGPT vs. Office Copilot

Why we believe AI4Business will support your team to be more productive, while decreasing the cost, giving you the competitive edge.

Category and functionalities		 AI4Business	 ChatGPT	 Office Copilot

Cost	Cost model Cost control Cost efficiency	Pay-As-You-Go, company level Company, app and user level Yes: Use smaller AI to basic tasks	\$30/month/user License assignment Fix cost per user	\$30/month/user License assignment Fix cost per user

Hub4AI - Security, Privacy, and Intellectual Property

Safeguarding your data is our top priority. We have established comprehensive measures to ensure that AI4Business operates within a secure, private, and compliant framework.

Security

Encrypted Communications: All data between your systems and our services is **encrypted** to prevent unauthorized access.

European DCs: We use AI engines in **European data centers only**, ensuring data sovereignty and compliance.

Secure Infrastructure: Our platforms have robust security measures and regular audits to maintain top protection standards.

Secure authentication: we use Client's Microsoft Active Directory, one of the most secured service WW.

Intellectual Property

Your Ownership: You retain full ownership of all content generated; IP rights are yours.

Provider Pledges: AI providers like Microsoft do not use your data for training models.

IP Assurance: We partner only with AI services providers that transfer IP rights to you.

Privacy and GDPR

GDPR Compliance: We fully comply with **GDPR**, prioritizing your privacy rights.

No Data Storage: Hub4AI **does not store** any content processed through AI Gateway, except when user ask it.

Consent for External Processing: If using AI engines outside Europe, we **seek your permission** first.

Why choosing Hub4AI as your agile and committed partner to drive AI adoption

Reliable Solutions, Accurate, Cost-Efficient

Reliability: Proprietary AI Gateway with load balancing and comprehensive prompt library

Accuracy: We test and recommend the most accurate AI services from Microsoft, Google, and the best engines available

Cost-Efficiency: Our platform is optimized for low AI credit consumption, selecting the most cost-efficient AI engine that delivers the required quality.

Proven AI Expertise

Gen-AI Expertise: Over two years of experience in Gen-AI services and projects

AI-Platform in Production: Successfully delivered multiple production-ready solutions

AI-Enhanced Processes: Successfully transformed several processes to achieve full efficiency using Gen-AI

Full AI-as-a-Service

Comprehensive Services: Full suite of AI services from workflow design to maintenance

Prompt Engineering: Expertise in developing and optimizing prompts for high performance

End-to-End Integration: Complete AI integration for seamless operation across systems

Exclusive Membership in AI Innovation Networks

Microsoft Founders Hub: Access to the latest AI engines, AI experts, and specialized AI training programs

NVIDIA Inception: Membership provides access to the latest AI-on-prem engines from NVIDIA, Deep Learning Institute resources, AI SDKs, and NVIDIA Enterprise Software.

AI4Business Service Offerings

Choose one of the packages below or contact us for a customized offer

	Startup S1	Startup S2	Startup S3	Medium M1	Medium M2	Medium M3	Large L1	Large L2	Large L3

What you'll receive:

- Dedicated cluster, that you can customize to adapt it to your business & tasks needs
- Add-ins for Outlook, Word, Excel, PowerPoint, Web interface and API() running on dedicated cluster, as SaaS
- Gen-AI experts: onboarding training (including Prompt Engineering), custom Prompts write by our experts
- Periodical updates with new AI engines, features, APIs, AI Agents and more.
- Flexibility to adapt your plan from one month to another. Cancel any time (30 days notification).

Managing AI Adoption Costs

To support adoption in an effective and stress-free manner, we are offering cost-efficient & flexible licensing model based on AI consumption,

This model, is empowering the companies to:

- **Control** the overall cost, both at company level and user level,
- **Allocate AI credits based on user** role or real needs,
- Offer access to anybody in the company to **test use cases specific to their job**, in a safe and private environment.
- Benefit from the AI revolution that is improving the algorithms every few months and decreasing the costs.
- Choose the AI engines that performs well on your tasks.

What user could to with 10 Euro/month?

Emails:

- 1000+ emails written or,
- Summarize 500+ longer mails

Word:

- 1000+ pages written or
- 1500+ analyzed pages

Excel:

- 2000+ lines processed or
- 1000+ chats based on a table
- 3-5000 dynamic AI operations

Web portal:

- 1500+ Chats with ChatGPT 4o or
- 280+ AI tasks with 5 files
- 300+ images analyzed
- 100-200 images generated

Azure Deployments steps

Main steps:

- Send a mail to sales@hub4ai.com with: your company name and its details, platform admin email (who will be the first admin) and the package you've chosen.
- We'll send setup details and contract.
- After we sign the documents:
 - we'll deploy, configure the server and send detailed setup instruction and 4 Office add-ins (.xml to upload them in Office Admin)
 - you'll need to configure the new server as an external app (in Entra / Active Directory) and upload the custom add-ins in Office Admin. The grant access to your colleagues (from Office Admin and/or Ai4Business).

Ready! Your team can enjoy the AI assistants in their daily apps.

The entire process takes maximum 1-2 hours and you can count on our remote support if needed.

For more details, please write us at contact@hub4ai.com

We thank you for your interest and hope boost you team productivity soon 😊!
