

Sample SOW:

Components	Scope	Parameters
Azure Kubernetes Services	Setup of Azure Kubernetes Components	Upto 2 Datacentres (zones) and 4 Environments
	Configuration of Application Components	Components required for Norbloc to run on Azure
	Deployment of Norbloc Application from Registry	Upto 1 Application (e.g. Norbloc Application which has 5 containers)
	Validation Testing for Kubernetes Service	
Azure Container Registry	Configuration of Azure registry	Up to 1 instance
	Integration for image push	
SQL	Setup of SQL on Azure	
	Configuration of SQL	
Redis	Setup of Redis on Azure	
	Configuration of Redis	
Azure Virtual Machines	Enabling Azure Virtual Machines based on services catalog	Up to 5 VM's
Vulnerability/Baseline Scans	Setup of Policies	Upto 10 defined policies
	Setup of scans for Norbloc Application	Upto 1 Application
Firewalls	Setup of Firewall	
	Configuration of Firewall Rules	
Azure Sentinel	Setup of Azure Sentinel	Up to 5 Policies
	Configuration of Data Source	Upto 1 Application
	Configuration of Threat Rules for Alerting	Upto 1 Application
Logging - Infrastructure	Setup of Azure Monitor	
	Configuration of Visualization Dashboards	Upto 5 Dashboards
	Configuration of Alert Rules	Upto 10 Rules
Logging - Application	Onboarding of Application into Azure Monitor	Upto 1 Application
	Configuration of Visualization Dashboards	Upto 1 Application
	Configuration of Alert Rules	Upto 1 Application
Monitoring - Setup	Configuration of Log Analytics Agent	
	Configuration of Data Collection Modes in Azure Security Center	
	Configuration of Security Policies	Upto 10 policies
Azure Key Vault	Setup of Key Vault	Upto 1 Application
	Creation of Secrets	Upto 1 Application

	Consumption of Secrets from Application	Upto 1 Application
Azure WAF	Setup of Azure WAF	Upto 1 Application and upto 5 policies
	Configuration of WAF Policies	Upto 1 Application
Azure Load Balancer	Configuring ALB for Norbloc application	Up to 1 application
Azure Active Directory	Enable and configure Azure AD	Up to 1 instance
	Integrate Azure AD with on-premise active directory and enable Azure AD Connect	Up to 1 AD
Azure DevOps	Setup of Azure pipelines	Up to 1 Azure account
	Configure one pipeline for application	Up to 1 application with 5 components (no customisation)
Backup - Infra Components in Azure	Configuration of Backup Policies	
Backup - Application Components	Configuration of Backup Policies	
Connectivity - VPN Configuration on Azure	Configuration of Site-Site VPN	
Azure Site Recovery	Setup of Azure Site Recovery	Upto 1 Site and sample virtual machine
	Setup of DR Policies
