Humaie Platform: Transform Work with AI-Driven Innovation
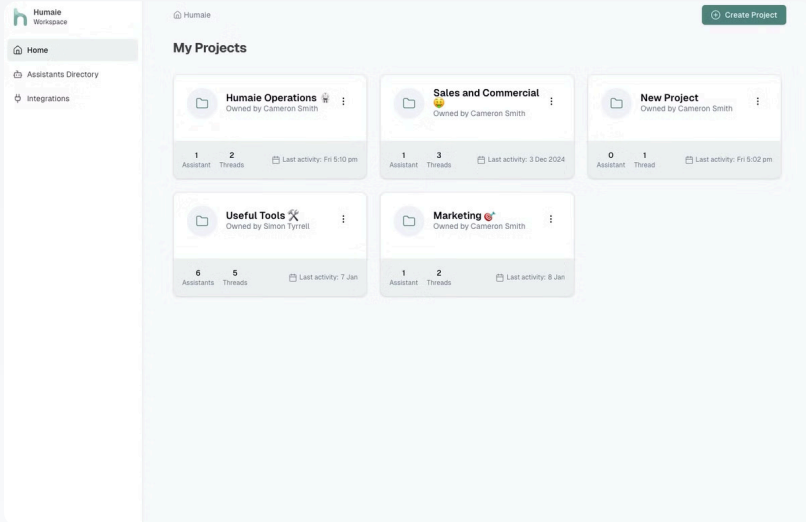

Humaie empowers businesses to unlock Generative AI's full potential. Our secure, collaborative platform enables experimentation, implementation, and scaling of AI solutions.

Built for enterprise, Humaie simplifies workflows, data integration, and AI assistant management. All data is kept onshore, hosted by Microsoft Azure.

Made with Gamma

What We Do

Use-Case Development

Rapidly develop and test AI use cases through tailored workflows.

Secure Experimentation

Foster organization-wide collaboration in secure environments.

Efficient Scaling

Seamlessly scale AI capabilities with minimal risk and maximum impact.

Humaie's Platform: Your GenAI Solution

Develop Use-Cases

Rapidly test AI solutions in secure, cost-effective environments at scale.

Experiment Safely

Prototype and refine AI-driven solutions collectively across departments.

Scale Efficiently

Align objectives and scale AI capabilities with minimal risk.

Security and Enterprise Grade

Robust Governance

Permission controls across workspaces, projects, and assistants ensure secure collaboration.

Transparency

Visibility into AI usage and decision-making fosters trust and accountability.

Azure Hosting

Regional hosting on Microsoft Azure guarantees enterprise-grade security and compliance.

Made with Gamma

No-Code Designed for Business

Intuitive Interface

No-code design, deploy, and manage AI-driven use-cases with ease.

Customisable AI

Create automated processes and customise AI assistants independently.

Rapid Implementation

Experiment and implement solutions without relying on IT teams.

Integration and Tooling

1	2	3

Secure Access

Connect to core business systems and applications securely.
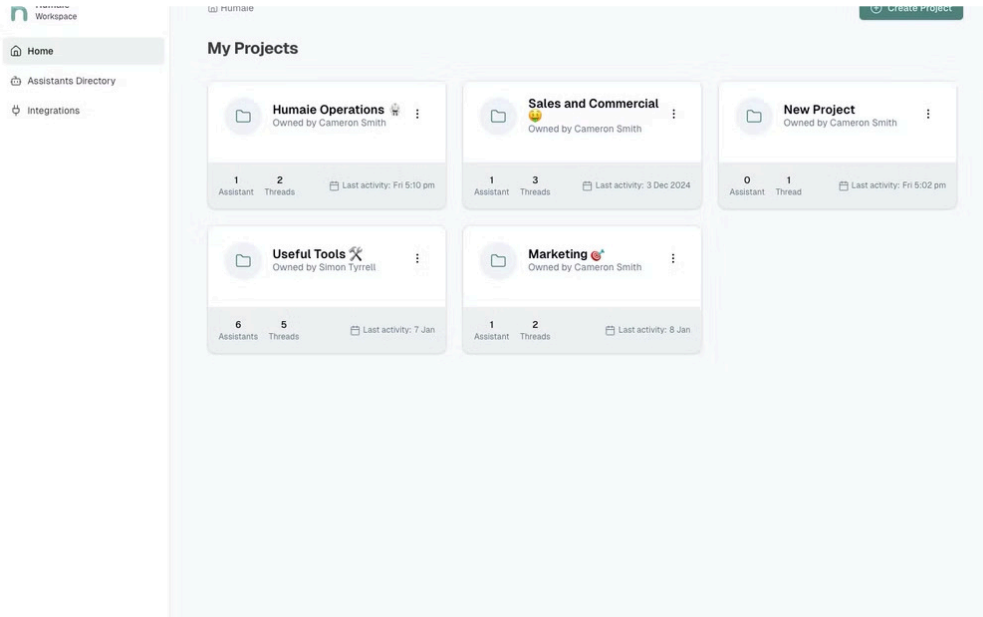

Out-of-Box Connectors

Leverage pre-built connectors for easy data integration.
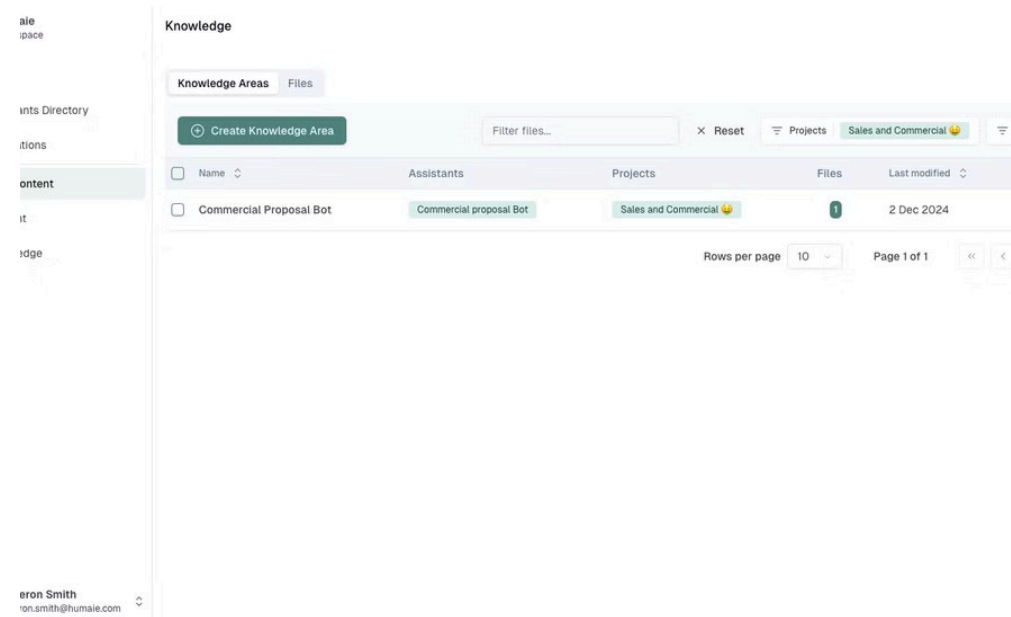

Compliance Assured

Ensure security and compliance with data regulations.

Collaborative Features

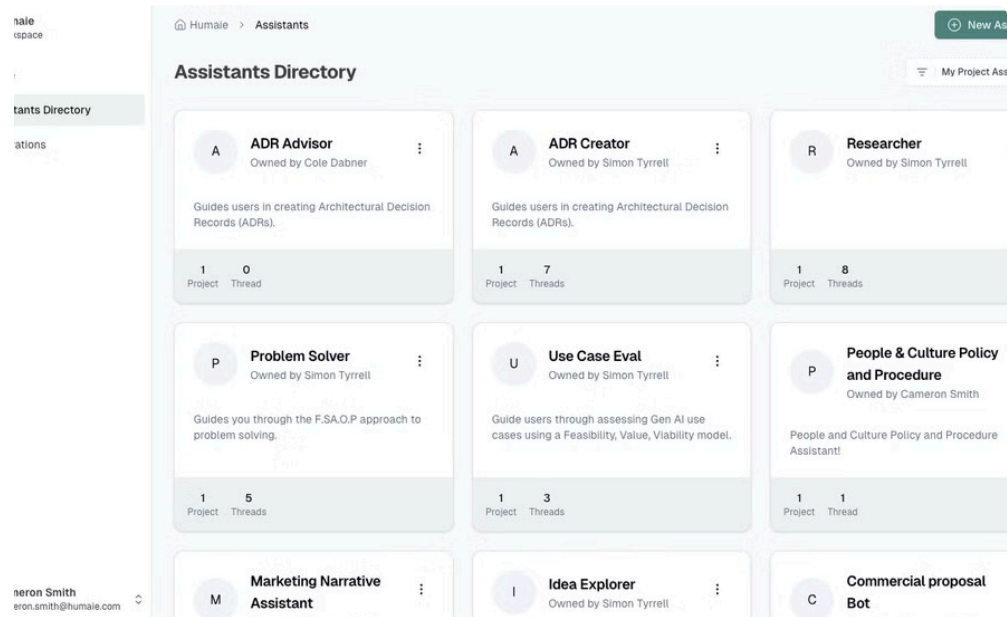

Workspaces and Projects

Create organization-wide collaboration with secure permissions and controls.
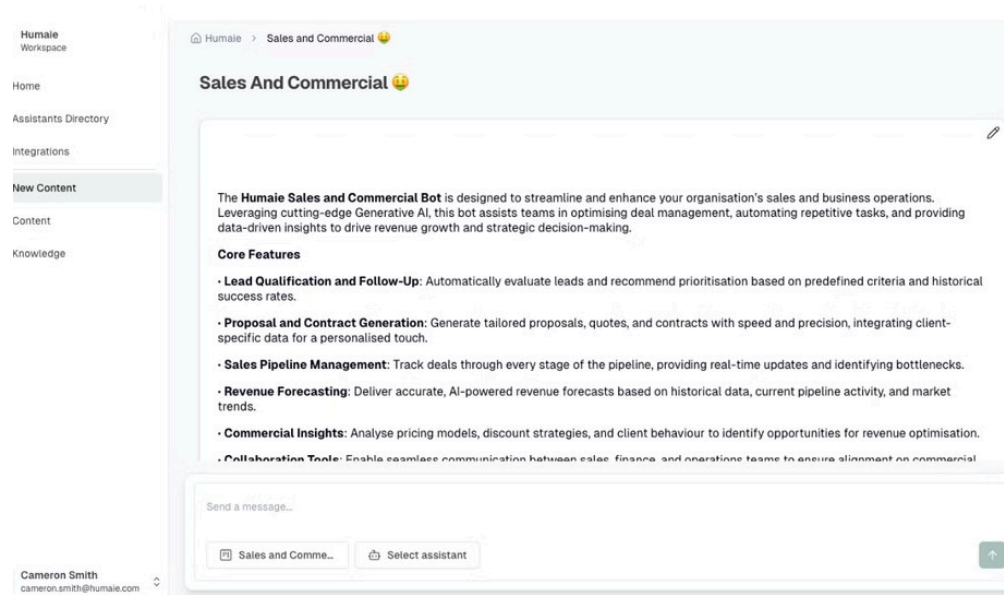

Knowledge Areas

Manage documents and files for AI Assistants, securely and without training use.
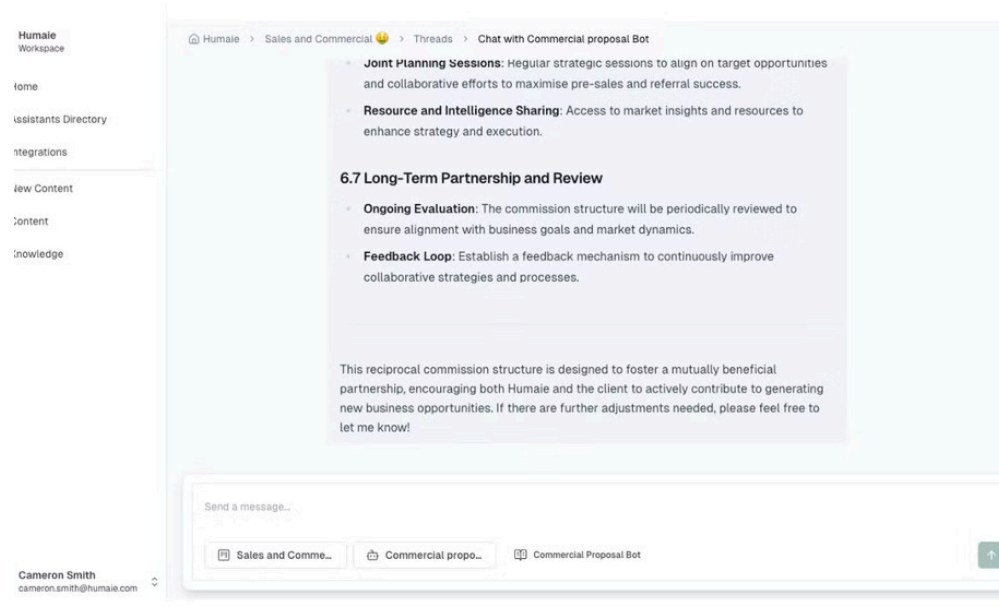

Collaborative Features

Assistant Directory

Assistants Directory give visibility to the whole organisation to create, manage Assists. Share assistants across projects. Get insights to assistant's roles and ownership

Pages

Build Pages to explain Projects, Assistants and key information for building GenerativeAI solutions.

Made with Gamma

Collaborative Features
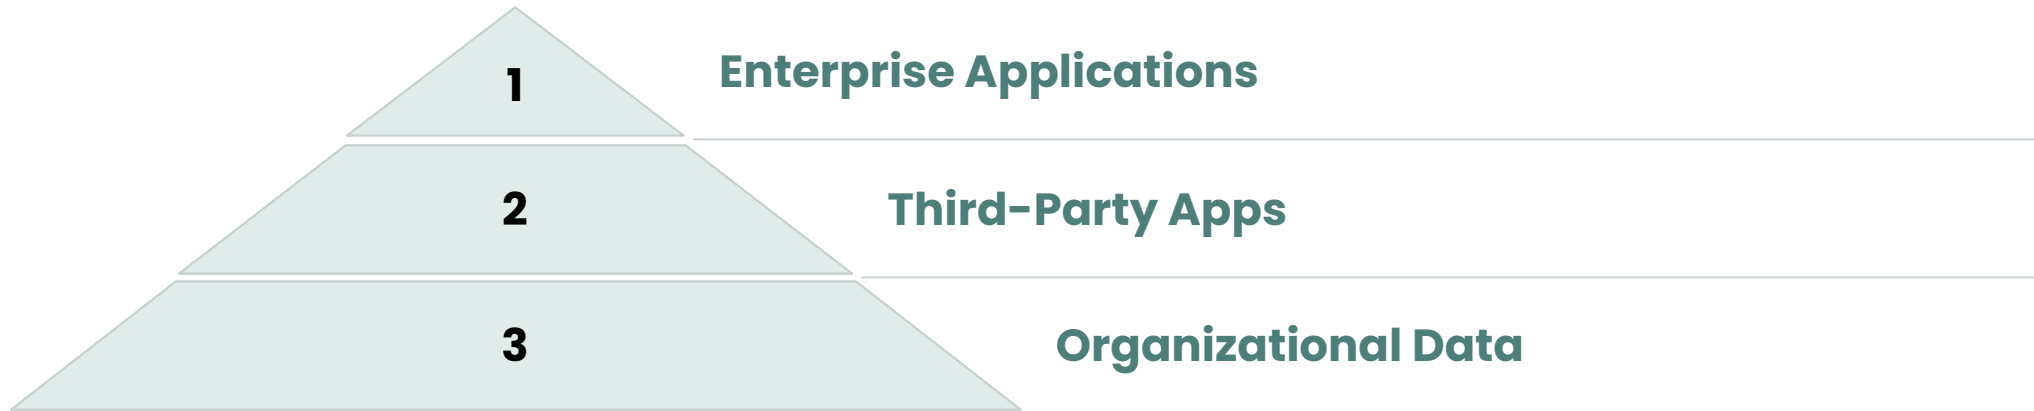

Multi-Assistant Chat

Leverage teams of Assistants with unique skills, instructions and tooling to create a team of assistants to get your business outcomes

Integration

Integrate to your unique organisational data, connect to your internal enterprise application or third-party applications

Made with Gamma

Integration Capabilities

1 **Enterprise Applications**

2 **Third-Party Apps**

3 **Organizational Data**

Seamlessly connect to your unique organisational data and internal or external applications.

Humaie's Generative AI Platform

1

Secure Platform

Enterprise-grade security for all your Generative AI operations

100%

Data Integration

Full access to company data, all hosted onshore in Microsoft Azure

24/7

AI Workflows

Seamless integration into daily operations

Transform scattered AI experiments into actionable intelligence. Enhance productivity and streamline solutions with Humaie.
