Humata's AI-driven platform revolutionizes prior authorization, improving patient care, and patient outcomes.

About Humata Health:

Humata is a Physician-Led AI company automating prior authorization (PA) for providers, payers, and patients. Humata's mission for providers and payers is to make 90% of PA touchless, enable processing to be completed in <2 minutes when human intervention is required, and bring complete transparency for patients throughout the process.

What we offer

Humata is transforming prior authorization (PA) and utilization management (UM) with generative AI and automation, creating efficiencies across the entire end-to-end process. From determination and clinical bundling to submission, statusing, and monitoring, Humata, hosted on Microsoft Azure, delivers seamless and efficient workflows for healthcare providers and payers.

Humata has helped customers realize 30% reduction in denials and dramatic improvement in PA approvals. As partners with BCBS nationally and UHC as well as key delegated entities like Evicore and Availity, Humata supports all specialties across all high-volume payers, setting a new standard for the PA and UM process

This is the next-generation of prior authorization, removing administrative headaches for providers and payers and patients receiving the care they need in a timely manner.

What our customers are saying

"Humata has been extremely beneficial for our RCM. By creating a centralized, technology-driven workflow, we've significantly reduced manual touches and enhanced our operational efficiency. This strategic approach is crucial for driving better financial outcomes and delivering superior care to our patients."

– Morgan Kroskie, Authorization Department Corporate Director, Allegheny Health Network

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve. Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.
Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.
We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.
With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
