IntraOne

Advanced Warehouse Software and Automation

EXECUTE OPTIMIZE EMPOWER

IntraOne™ by Hy-Tek Intralogistics is a Full Stack software platform which unifies the control, execution and management of all resources in warehouses and distribution centers whether human or mechanical while delivering a complete set of functionality.

Modular and adaptable, IntraOne is configurable to deliver the functionality you need today, and the foundation for future needs as technology and business requirements change. IntraOne helps mitigate risk, complexity, and long-term cost of ownership.

IntraOne UNIFIED FOUNDATION
- Web Based Singular UI
- System Administration
- Integrated API's
- User Management - SSO
- Dashboards - BI

WCS warehouse control

WES warehouse execution

WMS warehouse management

TMS parcel & LTL execution

Hybrid
IntraOne supports both Cloud and "Edge" deployment models to insure fast and scalable solutions. This includes support for multi-site deployment which delivers unified control of operations and data analytics.

IntraOne Connect
IntraOne Connect delivers a cloud based, user configurable no-code integration tool set to many ERP systems including Dynamics BC, F&O, NetSuite, Acumatica and others as well as applications like EDI. Coupled with IntraOne's base integration layer and off the shelf Dynamics GP integration module, IntraOne offers low risk integration that deliver big capabilities.

Advanced BI
Embedded BI & Dashboard functionality gives users access to all their data with IntraOne. Dashboards can be enterprise, departmental, or user-specific and can incorporate company KPI's for advanced analytics as well as data from other systems.

IntraOne Dashboards - unified across every module, users have complete access to all operational data

Secure
IntraOne delivers a secure platform for clients meeting SOC 2 standards. Built on Microsoft Identity, support for single sign-on is enables for seamless integration with existing IT infrastructure.

Flexible
IntraOne offers unmatched flexibility to support virtually any industry leading automation by leveraging a microservice architecture. Hy-Tek's R&D group, continuously evaluates new and emerging technologies that feed a never ending development cycle expanding IntraOne's capabilities and long term sustainability.
