Flexitricity

FLEXITRICITY SCALES VPP MLOPS TO DRIVE VALUE IN HOURS

Outcomes

- Flexitricity's VPP now has best-practice, automated MLOps pipelines that have reduced production time significantly.

- ML Optimisation has transformed the potential of experimentation for the internal team, increasing data science experiments to 10000+ per year.

- The models are secure by design, with governance guardrails and user roles access implemented.
