TAGENERGY BUILDS CENTRALISED RENEWABLE ASSET DATA PLATFORM TO POWER GLOBAL GROWTH

TagEnergy needed a centralised data platform to replace fragmented manual workflows, reduce reporting bottlenecks, and scale efficiently across multiple markets.

Outcomes

- Single source of truth for asset and market data across geographies
- Automated reporting, reducing manual effort and errors
- Portfolio-wide oversight with consistent benchmarking across wind, solar, and batteries
- Executive-ready dashboards for reliable leadership insights
- Scalable foundation for advanced analytics and optimisation
- Stronger internal capability through collaborative development

“We chose Hypercube because of their deep understanding of battery operation and the types of data workflows required to support them - this gave us the confidence that the partnership would be successful.”

David Teare
Director, TagEnergy
