

DCIM reinvented.

Meet **Hyperview**, the cloud-based Data Center Infrastructure Management (DCIM) platform leader that's changing the game for managing and optimizing your digital infrastructure. Built for simplicity and efficiency, Hyperview makes complicated tasks easy, helping you save time, cut costs, and avoid mistakes—keeping your data center running smoothly every day.

WHY CHOOSE HYPERVIEW?

Hyperview leads the way in modern DCIM by not just adapting to your needs but staying one step ahead. With advanced technology and a user-friendly design, we help IT leaders boost efficiency and resilience like never before. Whether you're running a single data center or a global network, Hyperview grows with your business, keeping you ready for whatever comes next.

hyperview

Comprehensive Asset Management

Gain full visibility into every component of your infrastructure—rack-mounted IT devices, virtual machines, sensors, and beyond. With Hyperview, you can easily monitor and manage these assets throughout their lifecycle, ensuring maximum performance and reliability.

Automated Asset Discovery

Forget tedious and error-prone manual audits. Hyperview's agentless, vendor-neutral auto-discovery tool identifies assets across IT, operational, and virtual layers using protocols like IPMI, SNMP, and BACnet. This means hassle-free updates and instant insights into your infrastructure.

Capacity Planning

Stay ahead of demand with advanced capacity planning tools. Optimize power, cooling, and space utilization using real-time insights and predictive analytics. Hyperview's tools help prevent bottlenecks, minimize downtime, and cut excess costs.

KEY FEATURES AND BENEFITS

Environmental Monitoring

Forget tedious and error-prone manual audits. Hyperview's agentless, vendor-neutral auto-discovery tool identifies assets across IT, operational, and virtual layers using protocols like IPMI, SNMP, and BACnet. This means hassle-free updates and instant insights into your infrastructure.

Energy Management

Reduce costs and optimize energy use with rack-level consumption tracking and data-driven PUE metrics. By identifying inefficiencies, Hyperview helps you make smarter decisions about energy allocation, all while shrinking your carbon footprint.

Robust Security

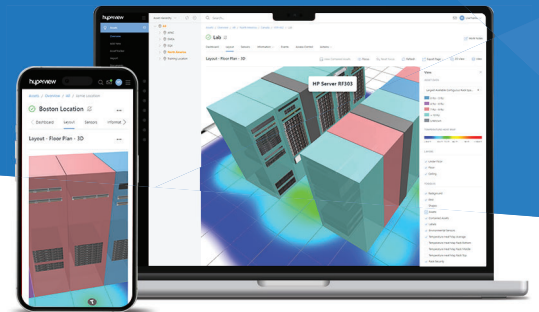

Data integrity is non-negotiable. Hyperview ensures your operations are secure with end-to-end encryption, granular access controls, and two-factor authentication. Manage your data center confidently, knowing your information is safe.

Seamless Integrations

Hyperview connects effortlessly with your existing systems, using open REST APIs to integrate tools like CMDB or ITSM applications. From procurement to management, Hyperview makes your systems work together smoothly so your team can focus on innovation.

ELEVATE YOUR DIGITAL TRANSFORMATION WITH HYPERVIEW

Our commitment to innovation means your infrastructure is ready for the challenges of tomorrow. Leverage Hyperview's robust platform to streamline processes, reduce risks, and drive measurable results. It's more than just a tool—it's a strategic partner in your digital transformation journey. Make Hyperview the backbone of your data center strategy today and lead with confidence into the future.

ADD-ON FEATURES FOR ENHANCED FUNCTIONALITY

Carbon Footprint Reporting: Track the environmental impact of your data center. Generate reports on energy use and carbon emissions to set sustainability goals and make eco-friendly decisions.

Connectivity: Document structured cabling effortlessly. Visualize your network mappings, track connections, and make informed changes in seconds.

Control: Remotely manage rack door access, PDU power outlets, and perform firmware updates, ensuring you maintain full control anytime, anywhere.

Pre-built Integrations: Easily connect with top systems like ServiceNOW CMDB for affordable asset discovery, Smart View for real-time infrastructure insights at Equinix, and DC Vision for remote AR/VR collaboration.

USE CASES ACROSS INDUSTRIES

Colocation: Ensure optimal performance and easy client interaction through interface and API integration. Synchronize operator-to-tenant instances for a consistent, reliable revenue stream.

Education: Manage sprawling IT infrastructures efficiently, ensuring seamless connectivity and energy optimization across campuses.

Finance: Maintain compliance and uptime with rigorous monitoring and analytics to ensure uninterrupted operations.

Healthcare: Monitor vital environmental metrics to protect delicate medical servers and ensure uninterrupted patient care.

UNMATCHED SECURITY AND COMPLIANCE

Hyperview is SOC 2 Type II certified—meeting the highest standards of security and compliance. From encryption to fine-grained user permissions, the platform is built with safety in mind. Plus, it helps you meet industry regulations like GDPR, ISO 27001, or HIPAA, offering peace of mind no matter your industry.

EFFORTLESS INTEGRATION FOR SEAMLESS OPERATIONS

Your operations are unique, and Hyperview is built to accommodate them. Integrate with your existing tools, extend functionality with its REST API, and ensure all systems work together to streamline workflows.

DISCOVER HYPERVIEW TODAY

With transparent pricing of just \$2 per asset per year (minimum purchase of 300 assets), you'll receive access to all core features, updates, and support without hidden fees. Hyperview empowers you to achieve unmatched efficiency and scalability while saving both time and money.

See how Hyperview can transform your data center's performance.
