Accelerator Benefits

S P E E D - T O - M A R K E T
Frameworks are implemented rapidly, allowing focus on the business problem on day one of an engagement.

F L E X I B L E
Every possible aspect of the solution is configurable.

T O T A L C O S T O F O W N E R S H I P
avoid expensive licensing of third-party products for orchestration and data processing. The accelerator uses Azure native PaaS services with a pay-as-you-go model.

S C A L A B L E
Since 80% of the solution is configurable more can be accomplished in project timeframes.

E X T E N S I B L E
This open platform can easily have new functionality added to it. Step-by-step documentation shows technical resources what is required to make enhancements.

E N T E R P R I S E G R A D E
Configuration, End-to-End traceability, Error Handling, & Content Auditing

Starting a cloud journey can be a long path starting from scratch. IBM can help save time and money with packaged accelerators that can save months in engineering with built in best practices from many Azure implementations.

Contact Asset owner, Andrew Holowaty, for further details.

Any support or installation of new or existing accelerator features falls under the guidelines of a regular IBM services contract
