

Major North American Retail Food and Drug Conglomerate

Project:

e-Commerce Modernization and Enablement on to Azure Cloud Native platform with Adobe

Products:

Adobe AEM, Microsoft Azure PaaS/IaaS and .NET

About the Customer:

One of the largest food and drug retailers in the United States, with both a strong local presence and national scale. Being in the top 100 of the Fortune 500 North American companies, they operate stores across 35 states and the District of Columbia under 19 well-known banners. They have a presence of over 2,200 stores and more than 250,000 employees.

Project Description:

IBM was engaged as part of a massive digital transformation project enabling 17 banners, across a single parent company, in a transformed e-Commerce platform. IBM worked to decompose the monolithic custom .NET e-Commerce platform in to highly consumable cloud native microservices in phases to be run against IBM led Azure PaaS centric Architecture and Design
