OUR SOLUTION

- The technology-backed comprehensive platform enables end-to-end digitization for the **Cash & liquidity, treasury, risk, trade finance and supply chain finance function** of the corporations
- Integrated, innovative and agile platform empowers the CXOs and Treasurers with absolute transparency, enhanced visibility, improve control, mitigate operational risk, drive automation, and optimize business efficiency.
- Recognized as "Major Player" in IDC Marketscape, the Globally Trusted & Industry's Premier Technology Market Research for the SaaS and Cloud-enabled Enterprise Treasury and Risk management Applications 2023 Vendor Assessment
- ISO/IEC 27001: 2013 certification facilitates a process driven organization aiming to secure people, process and technology. This certification is a testament of the security posture of the business and that it follows the highest industry standards.
- Facilitating a connected and integrated ecosystem, bringing together the Corporates (ERP), Market Data providers/dealing platforms and Banks in the ecosystem connected through one platform, "IBSFINTech".

TREASURYTECH PLATFORM

INTEGRATIONS:

ERP (e.g., SAP, Oracle) or any third-party Solution

Market Data Providers and Dealing Platforms (e.g. LSEG, Bloomberg)

Banks

THE BENEFITS

Transparency, Control & Visibility

Empower the Treasury and Trade Finance function with enhanced transparency, improved control and end-to-end visibility of the operations with IBSFINtech's Comprehensive TRTFM® platform.

Information Symmetry

The platform interfaces with external/internal systems to have real-time consolidation of data enhancing the information symmetry, visibility of business data, thereby enabling critical decision-making capabilities.

Unified View

Consolidating information at the global level is a critical requirement. The solution provides an intelligent decision support system for the CxOs which consolidates and provides a unified view at the group level, playing a pivotal role in driving the business continuity.

Integration with Disparate Systems

Inward and Outward integration to ensure a seamless flow of communication is a challenge when multiple systems are involved in the ecosystem. The platform has proven capabilities of seamlessly integrating with ERPs, Home-Grown/Third-Party Solutions, Banks, and Market Data providers (Refinitiv (now London Stock Exchange Group Business)).

Compliances

The platform embeds organization's internal compliances and external industry regulations. Audit trail, Email Notifications and alerts to stakeholders are configurable as per the requirements of the corporates.

Data Integrity

As data Integrity is of paramount importance, the platform enables single moment of truth for the top management, therefore ensuring data integrity across the Treasury & Trade Finance function of the corporate.

Process Efficiency

Inefficient and superfluous activities lead to no time for strategic thinking to generate value-add for the business. Automation with built in maker-checkers and other business policy validation, the solution makes the work processes more efficient.

FTE Optimization

With data flow from external systems and within the treasury teams (Front-office to Back-office), reviewing, authorizing or compliance validation becomes easier avoiding duplications and adjacencies. With reduction in duplications and redundant manual work, the corporates can drive Full time employee optimization.
