

DATA SHEET

# Microsoft Entra Assessment

## Identity Program Strategy and Implementation

iC Consult helps clients strategize, design, and implement Identity Programs based on industry best practices and extensive team experience. Understanding your current position and defining your short and long-term goals are the initial steps toward shaping a robust Identity Program. Our Blueprints are customizable to accommodate any organization size, at any stage of their Identity journey.

## Expert Assessment for Tailored Solutions

Our dedicated team of Microsoft technical experts meticulously assesses your unique business requirements. They thoroughly evaluate your existing infrastructure, analyze use cases, and review current processes and procedures. This comprehensive approach helps us gain a deep understanding of your business context.

## Comprehensive Reporting and Strategic Planning

We consolidate our findings into a detailed report that includes strategic recommendations for your next steps. This report is designed to encapsulate our assessments and insights, aligning them with your business objectives. It facilitates informed decision-making and ensures that your Identity Program aligns with your overall business strategy.

# Overview of Assessment Stages

By following a structured three-stage engagement process, we ensure a thorough and methodical approach to assessing your business needs, providing actionable insights, and guiding you toward effective solutions that drive sustainable growth and success.

## Stage 1: Discovery

Engage with key stakeholders to grasp the unique business needs and current IT setup.

1 week

## Stage 2: Assessment

Analyze strengths, weaknesses, and potential risks to draft an improvement roadmap.

1 week

## Stage 3: Roadmap

Deliver strategic presentations detailing findings and future steps for IT enhancement.

1 week

**Deliverables:** Executive Briefing Presentation | Detailed Implementation Roadmap

# Microsoft Entra Assessment Process

## Stage 1: Discovery

Engage with key stakeholders to grasp the unique business needs and current IT setup.

- Conduct interviews with stakeholders, application owners, IT teams, and infrastructure teams
- Deep dive into understanding your business objectives, challenges, and requirements
- Review Microsoft licenses to optimize usage and compliance
- Identify gaps and opportunities for improvement within your current setup

## Stage 2: Assessment

Analyze strengths, weaknesses, and potential risks to draft an improvement roadmap.

- Conduct SWOT analysis to identify strengths, weaknesses, opportunities, and threats
- Assessing potential risks associated with the current infrastructure, processes, and procedures, including security risks, compliance issues, and operational risks
- Comparing the current state of the business or infrastructure with desired future state or industry best practices to identify any gaps that need to be addressed
- Create a detailed report encompassing the current state, challenges, risks, recommendations, and a strategic roadmap for future initiatives

## Stage 3: Roadmap

Deliver strategic presentations detailing findings and future steps for IT enhancement.

- Conduct a presentation to the internal IT team, providing them with a comprehensive overview of the assessment findings
- Detailed presentation of the assessment report and executive briefing to key stakeholders
- Next steps

Deliverables: Executive Briefing Presentation | Detailed Implementation Roadmap
