

APPLICATION JOURNEY TO AZURE

A SEAMLESS TRANSITION, TAILORED TO THE BUSINESS AND DESIGNED TO MAXIMIZE THE COMPANY'S VALUE

IT'S TIME TO MIGRATE

Obsolete applications can have a **negative impact on brand image, maintenance costs, and operational efficiency for organizations**. However, the decision to migrate them to Azure to take advantage of its capabilities, is often delayed due to the **risk of disrupting business continuity**.

A GUARANTEED JOURNEY

As one of the few Microsoft partners to achieve the **Azure Digital App & Innovation and Data & AI designations**, we develop effective Azure migration strategies in two transformation stages:

UNDERSTANDING AND PLANNING

Drawing from our extensive experience in similar projects and leveraging tools like **Azure Migrate**, we create a customized plan for each client that ensures a **smooth and surprise-free transition**.

We design a roadmap considering key aspects such as **scalability, integration with other systems, and the security of data and applications involved**.

MODERNIZING AND EVOLVING

Thanks to our methodology developed for Azure and honed over the years, we ensure a secure and controlled migration based on three pillars: **technology, business, and people**.

 **Microsoft**
Solutions Partner
Digital & App Innovation
Azure

 **Microsoft**
Solutions Partner
Data & AI
Azure

IMPACTFUL RESULTS

- ⇒ Increased **brand value** perception and improved **user experience**.
- ⇒ **Standardization** of technology on Azure and **cost reduction**.
- ⇒ Enhanced **availability** and **security**, leveraging Azure's capabilities in these areas.
- ⇒ **Integration** with other enterprise applications.
- ⇒ **Optimization** of available resources.
- ⇒ **Scalability** and **flexibility** to add and modify functionalities according to business needs.
