SUPPLY CHAIN CONTROL TOWER

AN END-TO-END VIEW FOR OPERATIONAL EFFICENCY

Do you need to avoid interruptions, be sustainable and adapt quickly to changes in customer demand? We help you capture and use data from across the supply chain to have real visibility into your business and improve decision-making.

CONTROL YOUR BUSINESS INTELLIGENTLY

A control tower incorporates AI to enhance the visualization of business metrics and prescriptive and predictive information from the entire supply chain and business ecosystem in a single personalized dashboard, allowing problems to be solved in real time, anticipate problems, and even eliminate them before they occur.

OUR PROPOSAL

We implement the Control Tower that your company needs, applying our technological capabilities and experience in the Mass Consumption, Retail, and Industrial Manufacturing industries.

TECHNOLOGY PLATFORM
We designed and developed **a scalable consolidation, visualization and management platform** that integrates data from the business and its ecosystem allowing agile analysis of information.

INTELLIGENT MANAGEMENT MODEL
We define metrics for the different business processes that allow us to understand, prioritize and solve critical problems in real time and optimize decision making with AI and Business Intelligence techniques.

CONTINUOUS IMPROVEMENT
Our Business Transformation team analyzes metrics **to rethink and streamline processes** in search of continuous improvement.

BENEFITS

→ Greater **flexibility and prioritization** of responses based on customer events.

→ **Silo elimination** with increased information collaboration.

→ **Greater use of resources** to avoid waste.

→ **Increased efficiency** and better demand management.
