

20 Day Challenge

ICT Netherlands | Data Intelligence

Introduction

The world around us is changing fast and digital transformation significantly impacts the way we live and do business. It offers huge potential to make the world smarter while contributing to a more sustainable future. With a track record spanning more than 40 years, ICT Netherlands has both extensive multi-domain expertise and in-depth industry knowledge. Integrating these strengths into compelling technological solutions puts us in a unique position to help our customers make their business processes more efficient, flexible, simple, safe and – as a result – more sustainable.

In most cases, the potential benefits of using the data in your organization are huge. Although this is great news, it may also have a discouraging effect, because with all the options available you may not be able to see the wood for the trees. We bring order to this chaos and use a step-by-step approach to translate your requirements into new insights. Using our extensive experience in developing, implementing and maintaining Cloud Data Platforms as well as our well-developed capabilities in data analytics and data science ICT Netherlands can accelerate you in your digital transformation journey.

20 Day Challenge

Kick-off your journey to become data-driven using our step-by-step approach to translate your requirements into new insights. Together with ICT Netherlands you can dream big and start small to ensure maximal business value for your company!

USE CASES To fully be able to create new insights together we will define multiple use cases that add real value to your company. Based on business value, urgency, and/or potential we will highlight one case to challenge us!

QUICK SCAN Most companies already have a lot of data within different silos. Identifying the data landscape is key to start off on the right track. To deliver on the use case we connect and/or extract all relevant sources of data.

DATA DRIVEN Data turned into insights that drive improvement, control and performance management of your machines and company by delivering on the challenge!
