

ENGAGEMENT

# AZURE CLOUD ADOPTION FRAMEWORK LANDING ZONE

iCubed's Azure Landing Zone solution allows organisations to deploy a cloud infrastructure aligned to Microsoft's Cloud Adoption Framework.

The Azure Landing Zone engagement will leave your organization with a production-ready, well governed and secure Azure environment capable of supporting migrated and net-new deployments to the Azure cloud.

Landing Zones save time and reduce risk by automating the set-up of an environment for running secure and scalable workloads while implementing an initial security baseline through the creation of core accounts and resources.

## ASSESS

Assess your current Landing Zone deployment to identify gaps or areas for improvement to expedite your journey to the cloud. Includes review of key components: design, networking, governance, optimization, security, and operations.

## DESIGN

Workshops to review landing zone design and address required parameters for deployment, including tooling, timeline review, team roles, and initial assignments.

## DEPLOY

The deployment phase puts a focus on the overall deployment of the prescribed Landing Zone, including the creation of Infrastructure-as-code artifacts and automated deployment in alignment with DevOps processes.

## OPERATE

Implement management and operational best practices and enable for Managed Services, our team of Azure Experts providing 24/7 monitoring, management and support\*.

**COST: FIXED 20K**

*\*Cost does not include the monthly cost of Managed Services, which is calculated based upon Azure monthly consumption.*

## WORKSHOPS

### DESIGN

- Hierarchy & Billing, Azure Regions, Resource Groups
- Networking
- Security & Identity
- Azure Operations
- Governance & Cost Control
- Automation

### DESIGN PRESENTATION

Presentation to all stakeholders to explain design decisions and recommendations
