

Cyber security -  
**Security Awareness  
and Training**

# Why **Cyber Security Awareness** Training?

**Risk Mitigation measure** – To prevent compromises that are related to users acting/initiating malicious attacks due to negligence/lack of awareness – cybercrime isn't going away.

**Compliance Requirement** – To align with industry cyber security standards such as ISO27001 or NIST CSF and/or legislation and regulatory requirements such as POPIA, GDPR, etc. Depending on the business practices there may also be further requirements specified such as PCI DSS.

**Adherence to Governance** – Staff need to be informed of cyber security policy requirements and their obligation thereof.

## Key **Cyber Security Awareness** Threats

### **Phishing Emails**

fraudulent message designed to trick a human victim into revealing sensitive information

### **SMiShing (SMS Phishing)**

fraudulent practice of sending text messages in order to induce individuals to reveal personal information

### **Vishing**

fraudulent practice of making phone calls in order to induce individuals to reveal personal information

### **Malicious websites**

any website that's been designed to cause harm

### **Malicious Software**

any type of software that is intended to harm or hack the user

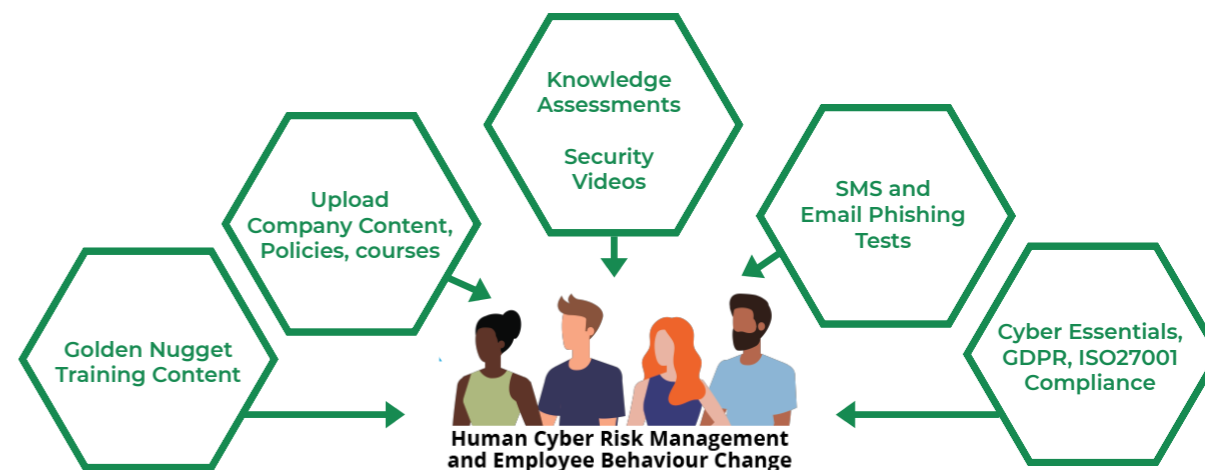

### **User behaviour**

irresponsible behaviour by users is a threat because it can lead to various compromises, e.g. weak passwords

# The Liquid Intelligent Technologies Solution

- **Cloud enabled platform** – scalable.
- **Ability to execute phishing simulations** - as part of a security awareness campaign.
- **Readily available training courses** and related content (e.g. videos) to initiate security awareness campaigns.
- **Customised content** created by an organisation can be added to security awareness campaigns.
- **Provides for on-going knowledge assessments** to ensure targeted training and engagement.
- **Includes comprehensive governance, risk and compliance** reporting to relevant stakeholders.
- **Significant differentiator** in its ability to provide **Real-Time Intervention**.

# The Cyber Risk Aware (CRA) - Next Generation Human Firewall

Assess the level of human cyber risk and create a **human firewall** and last line of defence against cyber criminals in **real-time**.

## Benefits:

- **Prevent breaches and attacks** – cybercrime isn't going away.
- **Build the right culture for security**  
– no plan or strategy can survive a bad culture.
- **Data & People protection** – policies are as good as they are known.
- **Better Information Security** - Internal threats are the most potent and lethal.
- **Compliance** – Data Protection, Governance legislation(s).
- **Cost effective** – Preventive measures are far cheaper than reactive measure.
- **Reputational protection** – Breaches are detrimental to your brand Equity.
- **Matures user behaviour** – Promotes adherence to acceptable use policies.

## Liquid Intelligent Technologies Solutions and Services Options

- **Demonstration and Proof of Value** - Demonstration and/or trial of the solution.
- **Product Solution** - Annual per user subscription license.
- **Product Solution + Professional Services** - Liquid to deploy the solution based on scope of work.
- **Managed Security Support** - Liquid to assist with platform management and responding to customer support requests.
- **Managed Security Services** - Liquid to provide day-to-day management of the platform and assisting with the execution of the cyber security content and security awareness campaigns aligned to Service Level Agreement.
