

Liquid C2 Services

Azure Landing Zones

Save time and reduce risk by automating the set-up of your Azure environment!

Azure Landing Zones, based on Microsoft Cloud Adoption Framework (CAF), enable organisations of all sizes to create a rapid, secure and efficient cloud foundation that scales as your business does.

At Liquid C2, we leverage pre-built and customisable Landing Zones to fast track your journey to a production-ready, well-governed, and secure Azure environment.

Whether you are building a new environment, aligning an existing one, or looking for ways to enhance and evolve – Landing Zones get you up and running in Azure quickly.

What's included?

Rest easy knowing our experienced team of cloud architects and delivery engineers will design and deploy your Azure Landing Zone – aligned to Microsoft best practices!

Discover

Review your current environment and understand requirements.

Key focus on networking, identity rules, governance, and security controls – Azure Assessment

Plan and design

Dedicated project manager to share project timelines, key milestones, and RACI.

Share the proposed Landing Zone design.

Deploy

Expert level cloud delivery engineers deploy the prescribed Landing Zone

Support

Leverage our Azure experts for 24/7 monitoring, management, and support.
