

Looking for extensive Identity and Access Management (IAM) services?

The Liquid C2 Microsoft IAM solution can cater to your needs.

Customer Requirements today:

Are you having trouble with unauthorized user access, misconfigured identities, excessive privileges, audit findings, lack of policy enforcement, and lack of identity and access reviews within your IT environment? These Identity & Access Management related issues can lead to a compromised environment susceptible to cyber-attacks.

The Liquid C2 Microsoft IAM solution protects users' identities & control access to valuable resources based on user risk level.

The Liquid C2 Microsoft IAM solution offers the following:

- Protection against unauthorized access to both on-premises and cloud applications through Multi-Factor Authentication (MFA)
- Enforcement of on-demand, just-enough-access, and just-in-time (JIT) administrative access when needed through Privileged Identity Management (PIM).

Microsoft IAM is crucial to our offering.

Key Benefits:

- Proactive Insights
- Low IT overhead, Easy to Integrate
- Simple to deploy, Seamless for users

Key Features:

Features of our Microsoft IAM solution include, but are not limited to:

- Azure MFA – Fraud alert, One-time bypass, Trusted IPs
- Pass-Through Authentication (PTA) – Conditional access policies, AD sign-in policies
- Seamless Single Sign-on (SSO) – Password synchronization, Alternate Login ID support

About Liquid Cyber Security

We offer Security Consulting Services, Product Solution & Professional Services, Managed Security Services, and Security Operation Centre Services, which all make up our Cyber Security Fusion Centre. Our cyber security approach focuses on two recommended frameworks, namely: Information Security Management System and Cyber Security Resilience Control Framework, to satisfy our customer needs.
