Titanium for Azure

Optimise, secure and save with Titanium!

As investment in the cloud continues to soar, organisations are faced with increased challenges around accurate forecasting, reduced wastage, and balancing potential security risks with optimisation.

Titanium for Azure empowers management teams to respond to these challenges using AI-powered procurement insights. Now, it's possible to delve deeper into an organisation's cloud spend, procurement data, risk, and usage – all presented in real-time, through clear dashboards.

What to expect

Optimise Cloud Spend

Understand and optimise cloud spend through powerful AI-backed recommendations, aligned with Microsoft's ten-point optimisation checklist

Minimise Risk, Improve Governance

Receive in-depth security insights and governance recommendations, identifying gaps in security and risks daily.

Control Resource Management

Understand Azure consumption, make sound business decisions, and identify reallocation opportunities

Key benefits

Consistent insights across environments and licensing.

Identify and address areas of risk and governance.

Extensive enterprise FinOps at your fingertips.

AI-powered recommendations for easy optimisation.

Accessible, custom-based reporting and dashboards.

Use cost transparency to understand Azure consumption.
