CICSA Cooperative Credit Union Ltd.

Who we are

Unified Technologies is a U.S. and Caribbean-based Technology Solutions and Services provider specializing in Microsoft Technologies.

Microsoft Solutions Partner

Specializing in Modern Work, Infrastructure, and Security.

Our Mission

We enable our clients to preserve, protect and grow their business competitively. We are unique as industry leaders because of our world-class experts and an iron-clad commitment to client satisfaction. We deliver unparalleled results for our client's most complex IT challenges.

What we offer

Our Microsoft consulting services includes Office 365, Azure Infrastructure, Unified Communications and Cloud Security.

Unified Technologies provides a fast and efficient, white glove approach to setting up, managing and supporting Microsoft Intune Infrastructure.

Our **Unified Technologies** engineers can assist you with all aspects of the Intune implementation including:

- ✓ User license assignment validation
- ✓ Device enrollment (Entra ID and Hybrid)
- ✓ User and Device group creation
- ✓ Applications and Windows Updates Deployment
- ✓ Auto Pilot configuration
- ✓ Implementation and management of security policies, including conditional access policies, to protect corporate resources.

Why Microsoft Intune?

Modern management for a modern workplace.

Cloud-Native and Scalable

- ✓ No on-prem infrastructure required
- ✓ Scales with your business
- ✓ Always up to date

Customer Outcomes

- ✓ Reduced IT overhead
- ✓ Faster onboarding and offboarding
- ✓ Improved compliance posture
- ✓ Enhanced employee experience

Empowering Secure, Flexible Work

Manage All Devices in One Place

Intune provides a single pane of glass to manage:

- ✓ Laptops (Windows, macOS)
- ✓ Mobile devices (iOS, Android)
- ✓ Virtual endpoints and more

Whether your team is in the office or remote, Intune ensures every device is secure and up to date.

Protect Your Data, Wherever It Goes

With built-in security and compliance, Intune helps you:

- ✓ Enforce encryption, antivirus, and password policies
- ✓ Block access from non-compliant devices
- ✓ Prevent data leaks with app protection policies

Your data stays safe—even on personal devices.

Embrace BYOD Without Losing Control

Support Bring Your Own Device (BYOD) with:

- ✓ Lightweight enrollment
- ✓ Clear separation of personal and work data
- ✓ No visibility into personal apps or content

Employees keep their privacy. You keep your security.

Seamless Integration with Microsoft 365

Intune works natively with:

- ✓ Azure AD for identity and access
- ✓ Microsoft Defender for threat protection
- ✓ Microsoft Purview for data governance

It's not just endpoint management—it's part of your Microsoft ecosystem.

Microsoft Security is a comprehensive suite of tools, services, and solutions designed to help organizations protect their digital assets, data, and users across various environments—cloud, on-premises, and hybrid. It encompasses a wide range of products and capabilities. Learn more at <https://www.microsoft.com/en-us/security>
