DevOps on Azure For Multinational Engineering Company

About Company:

A multinational company which is a part of significant technology, engineering, construction, manufacturing, and financial services conglomerate. It has global operations providing integrated 'design to build' solutions to large and complex Offshore and Onshore hydrocarbon projects worldwide. The company has over three decades of experience and expertise in the hydrocarbon segment

Country:

India

Industry:

Construction & Engineering

Organization Size:

Medium (1000+ Employees)

Solution:

DevOps

Products & Services:

- Azure DevOps
- Azure WebApps
- SQL on Azure
- Azure Virtual Machine
- Application Insights

About Company

A multinational company which is a part of significant technology, engineering, construction, manufacturing, and financial services conglomerate. It has global operations providing integrated 'design to build' solutions to large and complex Offshore and Onshore hydrocarbon projects worldwide. The company has over three decades of experience and expertise in the hydrocarbon segment.

Project Summary

With the client having different business verticals including offshore, onshore, construction services, modular fabrication and engineering services they wanted to modernize their way of development. They wanted an efficient way to streamline their deployments and bring their internal applications to production faster. Microsoft on-boarded IFI Techsolutions to help them bring DevOps practices into daily development and adopt Azure.

Challenge

Due to the client's large no. of employees their current infrastructure was fully on-premises, they wanted to modernize their existing infrastructure and applications. Also, the technology being used for Development like the version controlling and way of deployments had become outdated. We helped them take their development to a modernized approach by implementing simple but effective practices to streamline development.

Solution

We assigned a team of experts to assess and analyse the clients existing environment. Using the data collected we were able to build and implement a plan to modernize development. We helped the customers to streamline their development process with Azure DevOps. We were able to implement DevOps strategies including branching, CI/CD pipelines, etc. into their environment and move their applications to Azure WebApps. We were able to optimize deployments to have faster time to production.

The client team was able to reap the benefits of DevOps by implementing these services and practices into their organization.

Azure DevOps

About IFI Techsolutions

IFI Tech is a born in cloud **Microsoft Gold Partner** and a **Cloud Solutions Provider (CSP)** setup by ex-Microsoft employees to help global customers ranging from Enterprises to SMBs and Start-ups with their digital transformation journey.

- 6 Years in Business
- 310+ Projects Delivered
- 230+ Clients Transformed
- 50+ Professionals
- 2900+ Servers Migrated
- 35,000+ Consulting Hours

Here are a few ways in which we can help you:

- ✓ Free Cloud Strategy & Roadmap
- ✓ Free Azure POCs
- ✓ Free Migration Services – any Datacenter to Microsoft Azure
- ✓ 3 Months of Free 24x7 Expert MSP Services
- ✓ Free Azure Infrastructure Review & Optimization
- ✓ Free assessment of identifying workloads to move to Azure
