IFI TECH
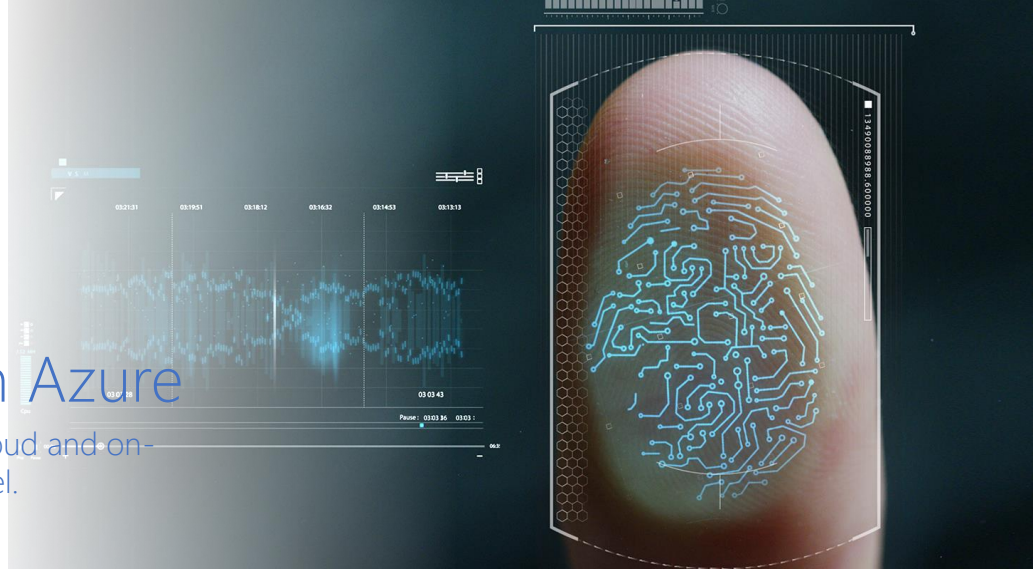

Hybrid Security with Azure

Intelligent security analytics for both cloud and on-prem infrastructure using Azure Sentinel.

Security enhancement is a continuous process, modernize your security operations with Azure Sentinel. Our team of certified cloud experts will provide you a custom solution for your organization.

What is solution?

Our solution includes a complete overview of the security, AI enabled solution to detect new potential threats and proactive and responsive SIEM for Hybrid Cloud Environments.

Why customers use solution

- Secure & Compliant environment

- Identify potential problems with growing IT environment

- Modernize & automate your security operations

- Azure Sentinel provides you a single Dashboard for all your On-Prem and Cloud Infrastructure resources

Enterprise Level Security

- Collect data at cloud scale
- Detect previously undetected threats
- Investigate threats with artificial intelligence
- Respond to incidents rapidly

$133B forecasted global spend on security by 2022

Analytics and Automation

- Azure Sentinel uses analytics to correlate alerts into incidents.
- Automate your common tasks and simplify security orchestration

Expected shortfall of 3.5M Security Professionals by 2021

AI Enabled

- Focus on finding real threats quickly using AI
- Reduce noise from legitimate events with built-in machine learning and knowledge based on analyzing trillions of signals daily.

Azure cloud is leading the industry with 90 compliance offerings

Testimonial awaited from customer.
