About Company

One of the global IT solutions and services company based in India. and amongst the top 15 IT service providers globally in 2017, according to the Everest Group's PEAK Matrix for IT service providers. Company has a global reach of around 32 countries and helping around 500+ customers accelerate their business.

Project Summary

Company had their IT infrastructure in Microsoft Azure, and they needed industry experts to help them implement Windows Virtual Desktop while maintaining the security and compliance mandated by their customers. This was done for around 4000 users on 400 VMs in a very short time span of 5 days because of lockdown imposed due to COVID-19 pandemic. We were selected as a partner given the immediate availability of our certified experts and our experience in implementing Azure Windows Virtual Desktop (WVD) solutions.

Challenge

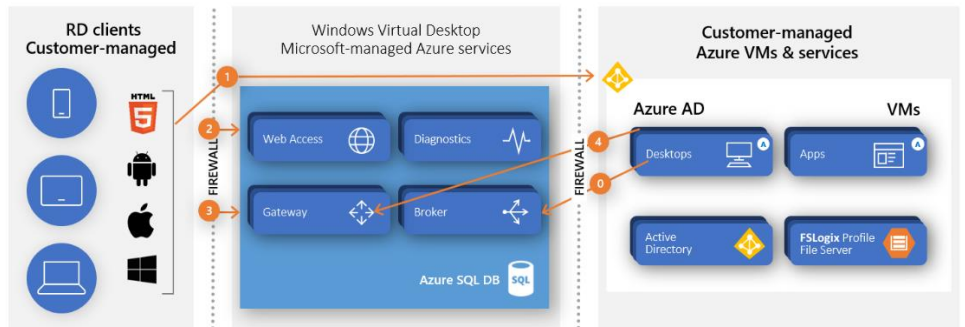

One of the biggest enterprises in India, had to declare work from home for its employees due to the lockdown imposed by Covid-19 outbreak. These employees were working as consultants on various different global projects and critical to minimize impact on their customers. Lockdown was announced at a very short notice leaving no time for any assessment or a Proof of Concept. The challenge was to get the Azure Windows Virtual Desktop environment up and running for its employees within a very short period as organization's employees needed to access their corporate resources from their home.

Solution

Given the urgency of situation, we put together a team of 5 consultants led by an architect in partnership with Microsoft account team. Following a thorough evaluation process, including extensive reviews of key stakeholders, we documented creative, business, technical, security and financial requirements.

From gathering requirements to designing a Solution Architecture, IFI Techsolutions initiated first phase i.e., "Project Planning" to setup a new WVD environment and onboard users to it.

As the solution got approved from Client's stakeholders, consultants from IFI Techsolutions started to implement Windows Virtual Desktop (WVD) for nearly 4000 users on 400 Virtual Machines. We used existing identity infrastructure to streamline access for the users. We implemented WVD with the existing compliance, security and governance. Security, Governance and Monitoring was a challenge. Also, we ensured that the environment is compliant according to Client's policies.

About IFI Techsolutions

IFI Tech is a born in cloud **Microsoft Gold Partner** and a **Cloud Solutions Provider (CSP)** setup by ex-Microsoft employees to help global customers ranging from Enterprises to SMBs and Start-ups with their digital transformation journey.

- 6 Years in Business
- 310+ Projects Delivered
- 230+ Clients Transformed
- 50+ Professionals
- 2900+ Servers Migrated
- 35,000+ Consulting Hours

Here are a few ways in which we can help you:

- ✓ Free Cloud Strategy & Roadmap
- ✓ Free Azure POCs
- ✓ Free Migration Services – any Datacenter to Microsoft Azure
- ✓ 3 Months of Free 24x7 Expert MSP Services
- ✓ Free Azure Infrastructure Review & Optimization
- ✓ Free assessment of identifying workloads to move to Azure
