***"With Power Platform our users save thousands of hours on routine tasks"***

*– Anton Bermúdez, CIO, IASO*

## WHAT WE OFFER

IFR offers its experience to help companies that want to have a quick deployment of Power Platform, to get the power of the best IA powered cloud platform with a real expert partner.

IFR delivers the services of deployment, training, and governance to help the customer all the way till a successful achievement in terms of productivity and citizen developer milestones .

The service also give our customers an Identification phase to ensure the discovery of all the apps processes that are able for a Low Code approach, with tools like Process Advisor.

With CoE (Center of Excellence) IFR help you developing a strategy for adopting, maintaining and supporting the Power Platform.

# Why Power Platform?

Accelerate innovation and reduce costs as you analyze data, automate processes, and build apps, websites, and virtual agents with Power Platform. Connect your components to each other (and to Microsoft 365, Dynamics 365, Azure, and hundreds of applications) and create end-to-end business solutions. With the COPILOT program, all Power Platform tools incorporate the most advanced AI from Microsoft and OpenAI.

## Power BI

Make informed and reliable business decisions by providing everyone involved with data-driven insights with Power BI. Copilot in Power BI incorporates the power of language models to help users create more value from their data. Simply describe the information or indicators you're looking for, and Copilot will do the rest.

## Power Apps

Turn your ideas into solutions for the business and let your departments create custom apps that solve corporate challenges with Power Apps. You can create an app with a few natural language words. Imagine it, describe it, and see how Copilot for Power Apps instantly generates your entire app, with a data table and back-end logic.

## Power Automate

Increase business productivity and get more work done by giving everyone involved the resources they need to automate organizational processes with Power Automate. With Copilot for Power Automate, simply by using natural language, you can create from a simple flow to a complex and robust process across the enterprise.

## Power Virtual Agents

Easily create virtual chat assistants (bots) to converse with customers and employees without writing code with Power Virtual Agents. Imagine describing what you'd like your bot to do in natural language and having it ready to use in seconds, without having to create and select dialogs step by step. This is Copilot for Power Virtual Agents.

Accelerate innovation and reduce costs as you analyze data, automate processes, and build apps, websites, and virtual agents with Power Platform
