IFS Energy & Resources – iLandMan

Industry-leading, cloud-based land mangement software for upstream oil and gas companies

iLandMan is the only cloud, tract, and formation-based system that automates the entire E&P land life cycle. It provides land professionals accurate net acreage values and real-time visibility into lease positions and often lowers land budgets by up to 30%.

Key product facts

1. iLandMan has created a market standard in online oil and gas land software for 15 years.

2. iLandMan customers maintain over 5.5 million acres of leases.

3. iLandMan has been used by over 150 oil and gas companies in the U.S. and has nearly 2,000 active users.

4. iLandMan possesses more than 110 reports, a report builder, and API connections for specialized reporting.
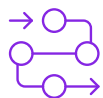

Improved efficiencies

- Tract and formation based for net acreage precision
- Real-time data on wells and leasehold positions
- Integrated and interactive maps via ArcGIS

Greater value

- Full automation of entire E&P land life cycle
- Flexible, adaptive, easy-to-use technology
- Virtual land department at your fingertips

Benefits

Manages oil and gas assets from acquisition and lease management all the way through revenue calculations and divestiture

Eliminates countless hours of spreadsheet data entry, typing errors, and duplication using a powerful online database and mapping system

Safeguards leases through automated processes that automatically creates obligation schedules with email notifications for Pugh clauses, lease extensions, shut-in payments, and more

Allows users to understand their true leasehold value by verifying net acreage on a tract-by-tract and formation-by-formation basis

Securely manages projects in the cloud allowing 24/7 access to data from anywhere in the world

IFS Energy & Resources – iLandMan

Features

- Tract and formation based
- Fully integrated and interactive maps
- Customizable project dashboards
- Intuitive workflows that drive down project costs
- Built-in reporting, access to over 110 powerful reports, and a create-your-own report builder
- Compatible across any device, i.e. mobile friendly
- Permission-based access
- Unlimited projects and users
- Unlimited phone support
- OCR Searching
- **iLandMapper** – Build and edit tracts and units without any third-party systems or GIS experience.
- **Division Orders** – Create a Royalty Division Order on any well, unit, or area within seconds.
- **Interest Decks** – Create revenue and expense interest decks from fully integrated tract and lease data, or by simply inputting interest into tables.

Combine these with iLandMan for increased functionality and an enhanced user experience.

Integrations

IFS BOLO – Reduce costs and increase profits by eliminating duplications, errors, and delays with realtime visibility of your data from the field to the C-suite when you integrate iLandMan and IFS BOLO.

IFS Tobin – Combine iLandMan and IFS Tobin for the upstream oil and gas industry's most powerful combination of lease management software and enterprise-wide spatial data.
