DRIVE
ACTION

Interact with live information from automation and manufacturing applications

Generate alerts with user-defined workflows to provide guidance and enforce standards

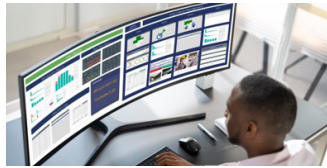

Clarify ownership – drive accountability

Escalate nonconforming alerts up the chain of command

Cut response times – solve problems faster

Minimize distractions – tune into what matters most

LEVERAGE
INFORMATION

Eliminate manual, non-value-added task

Synchronize information across all your data sources in real-time

Aggregate disparate OT/IT information sources in one platform

Eliminate data silos

Improve agility and mobility with a more connected workforce

Utilize technology to optimize operations and heighten productivity

EXTEND
VISIBILITY

Provide at-a-glance feedback on KPIs across your enterprise

Expand visibility of plant floor activities to the office network

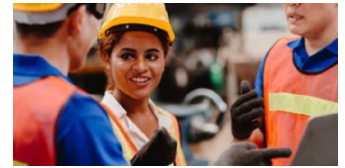

Know if you are winning today

Draw attention to performance gaps and process abnormalities

Adjust to concerning situations in real time

Lower costs, product defects, employee safety incidents, ...

IMPROVE
CULTURE

Improve team leader's skills and enhance their odds of success

Make the team member's job easier

Bridge the gap between the frontline and office worker

Accelerate the rollout of standards and best practices

Recognize employees for a job well done

Collaborate with team members – anytime, anywhere

Engage employees – improve employee retention & morale
