iLink Systems
Thinking Beyond

AZURE ACCELERATE FRAMEWORK

ADOPT A BETTER WAY OF BUSINESS

Organizations are rethinking their IT strategy and incorporating cloud due to the need to reduce expenses, infuse analytics in decision-making, and leverage new-age technologies and DevOps practices. However the journey to cloud can be demanding putting organizations in turmoil to find a solution which supports their business goals and objectives. When organizations decide to embark on the path of cloud, the deciding factors can be many such as cost, innovation, security, flexibility, productivity, etc. Companies are in the quest to find what should be the best approach to cloud journey and where should an it begin. One size does fits all model is inadequate in terms of answering the questions and challenges that an organization faces!!

iLink Systems Azure Accelerate Framework is designed to streamline an organization's journey to the cloud through a combination of training, workshops, comparative analysis and rapid prototyping. The 2-week Cloud accelerator assessment/workshop will cover planning session to help organizations determine the best Cloud approach for their business goals and objectives.

ILINK'S 2-WEEK AZURE ACCELERATE FRAMEWORK POC WORKSHOP WILL COVER:

ASSESSMENT STRATEGY & ROADMAP

Start by defining your own Journey to Cloud with insights tailored for you to achieve your most important business outcomes.

CLOUD TRANSFORMATION & MIGRATION

Ease the transition to a new operating model - migrate and modernize applications, build new cloud-based apps and transform your infrastructure.

CLOUD MANAGEMENT & OPTIMIZATION

As soon as you are up and running, we help maximize the value from your cloud investments.

We work with companies as partners with the goal to help them transform their business by helping them devise a strategy for how they can harness and deploy cloud services by understanding their business goals and requirements.
