Power BI Administrator: 1-day workshop   Price: $4,000

Acquire the skills needed to execute typical admin tasks and tools, such as Power BI admin portal and Office 365 admin center.

This module is designed purely for Microsoft Power BI administration and the management of a Power

BI tenant, including the configuration of tenant settings, usage monitoring, and provisioning of licenses, and other organizational resources.

Why our customers prefer Admin in a day:

Power BI admins will learn how to efficiently manage Power BI licenses and services while minimizing the licensing costs and being compliant with the security and IT policies of your company

Agenda:

- Power BI admin portal
- Automate the admin tasks with administrative APIs and PowerShell cmdlets.
- Specific Hands-on labs around using Premium capacity in Power BI
- Share the Power BI assets safely
- Use the Power BI audit log to optimize Power BI Usage.

Note:

There is no prerequisite for the workshop, however it is recommended that the participants have managed other BI instances
