

Power BI premium Implementation

Price: \$30K

Learn to unlock the full scope of Microsoft Power BI premium capabilities with our dedicated and enhanced resources to run the Power BI service for your organization.

This workshop will provide you with the in-depth knowledge about extracting full value from the Power BI premium, with a detailed implementation.

Why our customers choose Power BI premium implementation:

- Accelerate decision making with wide access to insights and policy implementation
- Unify self-service and enterprise BI and unlock big data with self-service
- Simplify data and access management
- Improve publishing efficiency and accuracy of BI content
- Greater scalability, performance and flexibility

Agenda:

We have divided the workshop broadly in following two parts:

1. Define and Establish
 - Conduct an initial architecture review, including setup, configuration, and assignment of relevant settings
 - Align the client with the patterns and practices presented as per Power BI Adoption Framework with Adoption strategy planning
 - Enablement of Self-service BI with the respective structure
 - Setup the process for in depth deployment covering various decisions and plans
 - Import, connect, aggregate data by using data storage modes and consumption depending on relevant parameters

2. Setup and Implement
 - Configure, secure various tenant settings and its administration
 - Conduct capacity planning and optimization for Power BI premium
 - Workplace management strategy based on various modes or stages of deployment, security
 - Gateway Management, monitoring, configuration, administration
 - Installation & Provisioning of the product, configure deployment pipeline
 - Setup the security settings related to workspaces, cloud apps, sharing of data, information protection, private link
 - Performance Monitoring & Tuning based on various metrics
 - Provide Best Practices & Establish Standards to build a data culture and increase engagement
