# Beautiful School Websites. Unlimited Support.

Take Control of Your Web Presence.

Content Manager provides a fast, simple way for school boards to run fully integrated public websites and private intranet. Backed by Imagine Everything's timely, all-inclusive design support, maintaining an outstanding web presence has never been easier or looked better.

Identity Based Content Delivery

Page content, news, and events, all adapt inside Content Manager to deliver the most relevant information to target audiences based on their identity. This means staff see their favourite services and links as well as news curated specifically for their interests while students, parents, and community will see information designed for them.

Unmatched Flexibility

Our powerful page rendering engine reverse engineers even the most complex, mobile-friendly designs into simple web forms that a staff of any technical aptitude can edit. Regardless of your design requirements or wish-list items, our custom built templates give you the flexibility and control you need to make it all happen!

About Imagine Everything Inc.

Imagine Everything is an education technology company that works directly with school boards to design and build software at cost. We've taken the longevity and temperance of public education and mixed it with the speed and efficiency of the private sector to create a revolutionary new hybrid.

See what customers are saying:

"Imagine Everything isn't just slinging tacos ... we didn't buy a product from them; we partnered with their expertise in design and software development. Together, we built something special. The difference is substantial."

– John Schutte, Director of Information Technology, Calgary Catholic School Division

Why Microsoft Azure?

Sign in with Microsoft

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
