

# STUDENT AWARE

**Identify and rescue vulnerable and at risk students.**

**Student Aware** identifies and notifies administration when students present signs of suicide, violence, abuse and other dangerous online activity.

**Monitor student traffic on all devices, including Chromebooks.**

All website requests, including those from Chromebooks, are logged according to user identity... even while roaming outside your network firewall (optional).

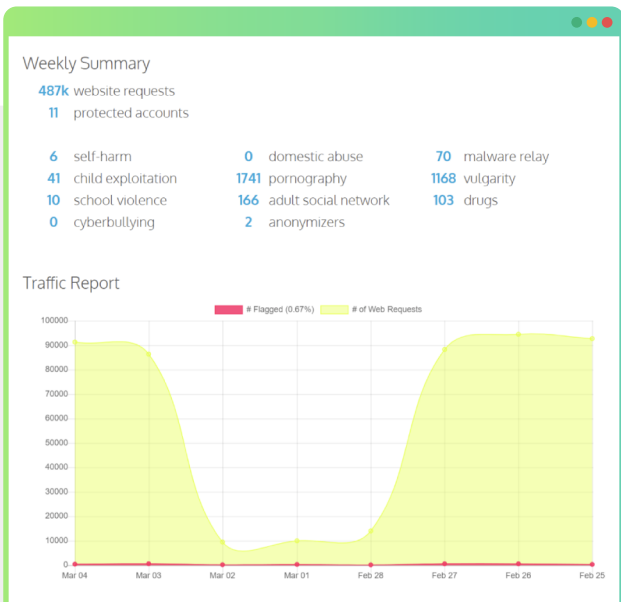

**Powerful, real-time searching.**

Search all web traffic by keyword, date, or risk type. Enable live mode and watch real-time results with all filtering options.

**Beautiful, interactive analytics that help visualize activity.**

When we saw the first version of Student Aware we felt compelled to be involved. The potential to protect students was significant and the founders of the company have a history of being incredibly responsive to schoolboard needs.

Horizon School Division

**Investigations and notifications.**

When high risk incidents cross thresholds defined by your school board an investigation is launched and schools are notified.

**A fast, easy, and secure deployment that takes about five minutes.**

**Ready to identify and rescue vulnerable and at risk students?**

Contact us today to learn more or to book a demo.
