

# Secure AI Productivity Accelerator

Productivity accelerator with secure AI for Microsoft 365

Copilot

Microsoft-funded engagement that enables organizations to assess, prepare, and accelerate the adoption of secure AI productivity with Microsoft 365 Copilot, integrating security, governance, control, and privacy by design and by default.

## What does it enable?

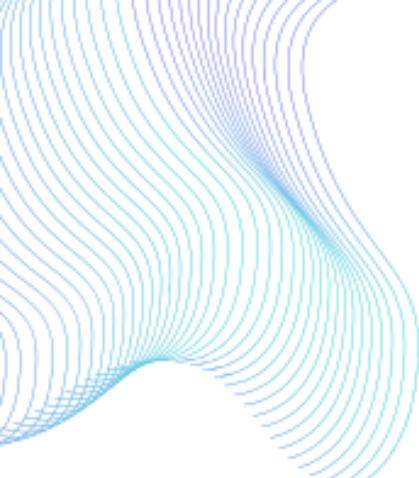

- Prepare the organization for Copilot
- Strengthen security and digital identity
- Define AI governance and responsible use
- Accelerate productivity without compromising control

## Who is it designed for?

- Organizations with an active Microsoft 365 environment
- Organizations evaluating Microsoft 365 Copilot
- Teams focused on security and compliance
- IT, Security, Compliance, and Executive leadership teams

## What does the accelerator include?

- AI and Copilot readiness assessment
- Security, identity, and data analysis
- Identification of priority use cases
- Definition of controls and Copilot-ready guidelines

### Customer deliverables

- ✓ Organizational readiness report
- ✓ Prioritized use cases by impact
- ✓ Adoption roadmap (90 days)
- ✓ Technical and governance recommendations

### Engagement duration

5 Days

Microsoft-funded engagement, subject to Microsoft-defined eligibility criteria.
