We deliver digital services that help our customers with strategic execution through proactive advisory and the implementation of innovative digital solutions:
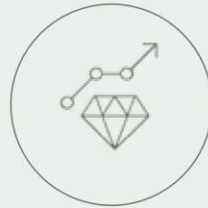

Digital Advisory
Business development & Process optimization
Enterprise architecture consulting
Cloud & Data strategy Organization & Change management
Technology & Platforms

Solution Delivery
Program & Project management
Solution design & development
Agile delivery teams
Testing, QA & Deployment

Digital Excellence
Organizational onboarding
Platform training & Enablement
Analytics & Insights
Personalization & Automation
Experience optimization
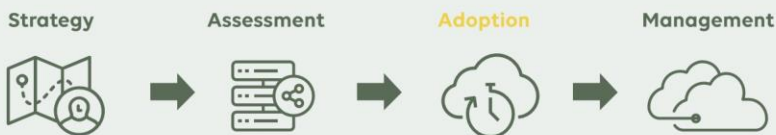

Managed Services
Proactive monitoring
Application Management
Cloud Operations Service & Support (24/7) DevOps

WEB APP MODERNIZATION AND INNOVATION

Immeo is a digital consultancy and Managed Service Provider providing technical assessments and assistance in connection with application modernization for customers looking to migrate and modernize their on-premises workloads and mission critical applications to Microsoft Azure.

Immeo help clients migrate their existing on-premises applications to Microsoft Azure and provides a complete service with an approach to follow the guidelines, define architecture and build cloud solutions based on the Well-Architected Framework, consisting of security, reliability, performance efficiency, operational excellence and cost optimization best practices.

The main goal is to modernize applications based on new architecture using cloud native features and services, giving you an enhanced management experience. This offering is suitable for organizations, who have embraced the Immeo **Cloud Readiness and Migration Assessment**, to help understand the application landscape and determine and priotize the highest value applications to be modernized to Microsoft Azure.

Strategy → Assessment → *Adoption* → Management

Services includes:

- Kick-off / Introduction
- Application specific assessment
- Overview of application challenges and integrations
- Design and migration options for applications and environments
- Migration Plan
- Define and choose suitable Azure Blueprints
- Recommend a DevOps practice
- Implementation of the target cloud architecture and services
- Technical and functional test of implemented solution

BUSINESS BENEFITS AND OUTCOME

Insight
Overview of current applications and issues, that need solutions before the migration process.

Skills and capabilities
Overcome the lack of Microsoft Azure skills and capability barriers.

Future proofing
Make sure your applications can live up to future business requirements.

Scaling and cost optimization
Scale applications on demand using auto-scaling features of Microsoft Azure and optimize on cloud spend.

Performance
Obtain higher application health and service availability with modernized applications run on Microsoft Azure.

Agility
Perform daily changes and releases to deliver business value faster with DevOps practices.

Cloud Consultancy Services	Cloud and Security Assessment	Design and re-design of cloud architecture	Application Modernization and Innovation	Cloud Implementation	Cloud Migration and Transition	Diagnosis and Troubleshooting	Security and Performance Testing	Well-architected Review

Cloud Operations Services

CLOUD CONSULTANCY SERVICES

The **Web App Modernization and Innovation** service offering delivers the foundational framework for repeatable best practice, utilizing Microsoft architecture blueprints and Azure DevOps processes.

Immeo follows a phase divided approach consisting of an application assessment and design phase followed by an implementation and testing phase. During the assessment and design phase, Immeo´s cloud application modernization team review the clients organization´s and application's unique requirements and dependencies in order to customize and accelerate the deployment of an appropriate Microsoft Azure based web application.

Following the Well-Architected Framework, key security, reliability, performance efficiency, operational excellence and cost optimization and requirements are addressed in the begining of the project, together with a technical backlog via a series of collaborative workshops and knowledge transfer sessions with the client.

During the implementation phase, Immeo´s cloud application modernization team will assure, that the Client´s modernized applications are implemented and operational on Microsoft Azure in alignment with best practices, defined organizational standards and IT-policy.
