POWER BI ADMINISTRATOR TRAINING: ONE-DAY WORKSHOP

This one-day course will walk attendees through the administration and management of a Microsoft Power BI tenant. It will include the configuration of tenant settings, usage monitoring, and provisioning of licenses, as well as other organizational resources.

Together, we will cover typical admin tasks and tools, such as the Power BI admin portal and Office 365 admin center, and how to automate them with administrative APIs and PowerShell cmdlets. Specific hands-on labs will focus on using the Power BI Premium capacity, safely sharing assets, and using the audit log to optimize usage.

PREREQUISITES

Must have DIAD training or equivalent working experience.

DELIVERABLES

Upon completion of the training, Impact will provide a certification to all attendees, along with files, reports, and dashboards generated throughout the sessions.

ABOUT IMPACT NETWORKING
