Intune Overview

Today's employees expect the ability to utilise their IT assets from anywhere, 24x7. The challenge is to ensure that these assets are securely and seamlessly managed so that your business can focus on what it does best, whether that be in the office, on the road, at a client's site, or at home.

imagine having a product that can manage all your end-user devices and apps, anywhere, anytime. imagine having a consulting service that grows and moves with your business as you need it.

imagine no more. The end-user management experts at impeltec can make your always-on environment a reality with Microsoft Intune.

Features

Modern desktop: get the most integrated and complete device management, app lifecycle management, and user provisioning capabilities for Windows 10.

MDM/MAM: protect your data while maintaining productivity for your employees on the mobile devices and apps they choose.

Conditional access: policies that only allow the right people under the right conditions to access your company data.

Information protection: provide the Office experience your workers expect without compromising user productivity.

What do I get?

Analysis: impeltec experts will work with you to understand your business needs and design the service to make sure you are getting full value for money.

Microsoft Intune: we will coordinate the subscription and setup process and provide expert consultants to bring your corporate and BYOD assets under management.

Peace of mind: remove the hassle of maintaining on-premises infrastructure to manage your devices and apps. Always get the latest features as they are released.
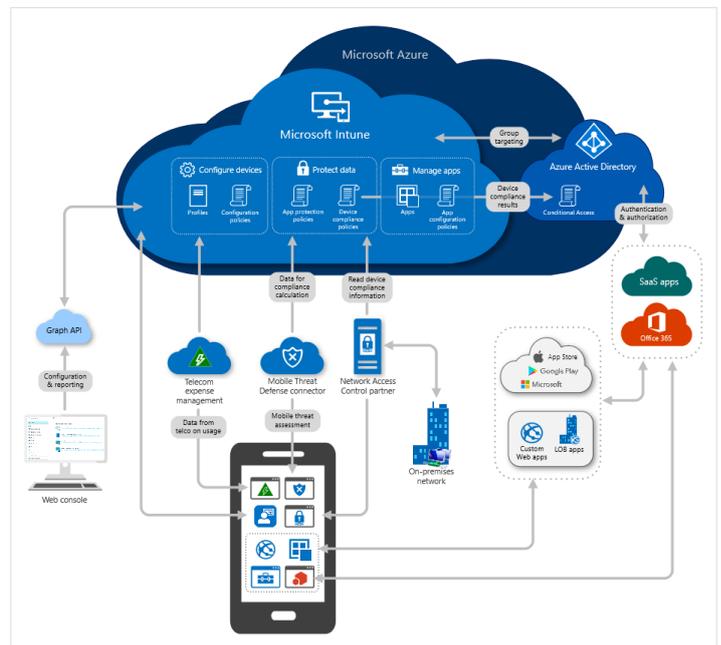

Predictable budgets: streamlined monthly payment cycles. Since the infrastructure is hosted by Microsoft, you are removing a large risk component from your IT budget.

Is it for me?

- Does your business currently have no, limited, or out-dated, endpoint management infrastructure, or no virus and malware solution?
- Is the cost of efficiently managing your end-user assets a strain on your resources and budget?

- Are your IT assets in dispersed locations making your management of them a costly challenge?
- Do you want to enable granular access control to your resources?
- Are you looking for a way to easily manage employees' BYODs (Bring Your Own Devices)?
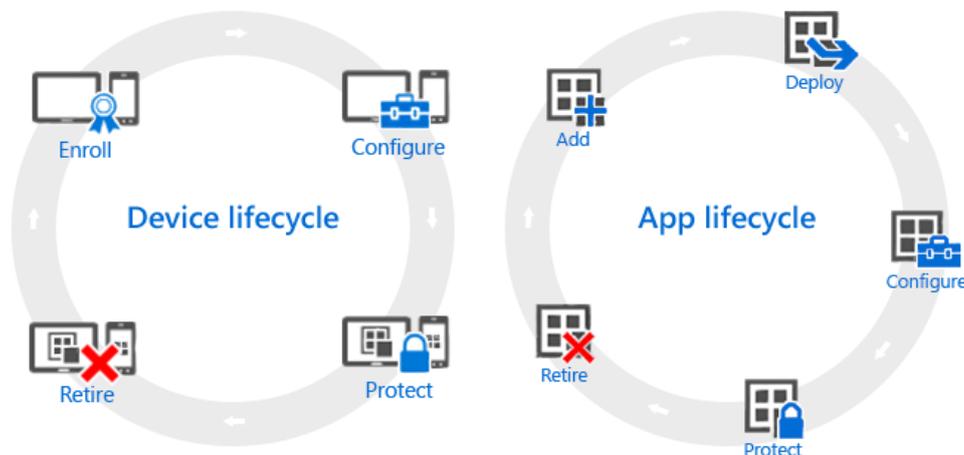

Details

impeltec provides flexible consulting services for Microsoft Intune. We can help get you up and running in no time. Couple with our impelOps service to have all your ongoing end-user device management needs covered.

impeltec info

impeltec focuses on offering Windows®-based SOE (Standard Operating Environment) build services for end-user computing, as well as complementary services such as application packaging, deployment consulting, and systems management.
