## What is Azure Consulting Services

As a small to medium business, you may need more resources to build and manage your cloud infrastructure. But with Azure consulting services, you can get the help you need to start with Azure and use its robust cloud services to grow your business. Azure consulting services can help you with everything from planning and migration to deployment and management.

# How Imperium can help you with **Azure Consulting**

- ✓ Choose the right Azure services for your needs
- ✓ Migrate your existing applications and data to Azure
- ✓ Design and implement a secure and scalable Azure architecture
- ✓ Deploy and manage your Azure environment

## Why Your Organization Needs Azure Consulting Services

### Accelerate your cloud adoption

Our Azure consulting services can help you quickly and efficiently migrate your applications and data to the cloud so you can start getting the benefits of Azure sooner.

### Optimize your Azure usage

Our expert consultants can help you choose the right Azure services for your needs and optimize your Azure usage to save costs.

### Improve your security and compliance

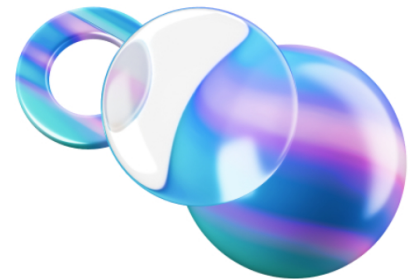

Our Azure consultants can help you design and implement a secure and compliant Azure environment.

### Get expert support

Azure consulting services can provide access to a team of experienced Azure experts who can help you with all aspects of using Azure, from planning and migration to deployment and management.

## What You Can Expect from Our **Azure Consulting Services**

#### **Optimal Azure migration costs:**

We design a cost-effective Azure migration strategy to reduce development costs.

#### **Reduced cloud consumption costs:**

We automate resource orchestration and optimize Azure services to reduce cloud consumption costs.

#### **Better development speed:**

We help you set up Azure services and design CI/CD pipelines to streamline development and accelerate delivery.

#### **Increased cloud security:**

Our consultants help you optimize identity and access management with Azure Active Directory and implement component-level security.
