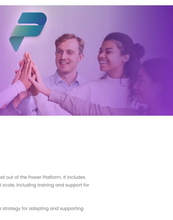
Center of Excellence (COE) Package for Power Platform

Empower your organization to maximize the value of Power Platform

Consult Now



Overview

The COE Package is a comprehensive solution to help your organization get the most out of the Power Platform. It includes everything you need to develop, implement, and manage Power Platform solutions at scale, including training and support for citizen developers.

The COE Starter Kit is a collection of tools to help you get started with developing a strategy for adopting and supporting Microsoft Power Platform.

Most companies focus on the IT aspects of a COE, such as security and licensing. However, we at Imperium Dynamics take a different approach with our COE package. We believe that the most important part of a COE is to nurture citizen development. Citizen development is the process of enabling non-technical users to create and deploy their own applications. We focus on training the COE team on how to use Power Platform, and we also help companies to identify the leaders in their company and train them for the ability to grow at an accelerated rate.

The COE Package Includes The Following

- **COE Starter Kit Installation:** We will install and configure the COE Kit for you, so you can start using it immediately.
- **COE process design support:** We can help you design a COE process that meets the specific needs of your organization, including a focus on nurturing citizen development.
- **Customized templates:** We can create customized templates for your COE, based on your unique requirements, including templates for citizen development initiatives.
- **Ongoing app development and management:** We can provide ongoing app development and management services to meet your evolving needs, including support for citizen developers.
- **Citizen development training:** We can provide training to your team on how to use Power Platform to create and deploy their own applications.

Benefits of The Package

Streamlined Setup

We can ensure that everything is set up correctly and efficiently. This can reduce downtime for your IT department.

Expert Guidance

We have the expertise and experience to help you set up your Power Platform CoE quickly and efficiently, saving you time and money. We can also provide valuable guidance and support as you get started with the platform.

Monitor Costs

We can help you to monitor and control the costs associated with your innovation and improvement efforts. This is because COE packages typically include tools and processes for tracking costs and measuring the return on investment (ROI) of new solutions.

Eliminate Risks

We can help you to eliminate the risks associated with developing and implementing new solutions. This is because COE packages typically include tools and processes for managing risk and ensuring that new solutions are aligned with your organization's goals and objectives.

Process to Get Started

Here are a few tips for getting the most out of the COE Package

Start by developing a COE strategy

This will help you define your goals for the COE and identify the resources and support you need.

Implement the COE Starter Kit

This will provide you with a solid foundation for your COE, and it will help you to get started quickly and easily.

Provide training to your team

This will ensure that your team has the skills they need to develop and implement Power Platform solutions, including citizen developers.

Take advantage of our ongoing support services

We are here to help you with any problems you may encounter, and to ensure that you are getting the most out of your investment.

Our Customer Success Stories

R&R Partner

Government

Imperium Dynamics developed a legislation tracking system and customer portal to streamline R&R Partner's reporting process for improved client satisfaction and operational efficiency.

Maritime Industry

Government

The company had redundant data and process across multiple systems, which caused inefficiencies in their scheduling and reporting processes. There was also limited access to live or historical data for management and sales teams.

Save Health

Government
