Imperium Hourly is a Power Platform based Time reporting solution that plugs into your existing Dataverse or Dynamics 365 CRM implementation. The application consists of two major areas below

-Hourly Canvas App

The canvas app is a tablet and browser friendly mobile application designed for Employees and Managers. Employee can submit their time against projects they are working on through a simple interface and can also track their submissions and approvals. Managers can approve or reject submitted time for anyone working on their project.

-Hourly Management Model Driven App

The Imperium Hourly Management Application provides project managers and directors to easily create a project(s) against a customer account and assign team members to the project while selecting it to be billable or non-billable. The application also provides multiple weekly and monthly dashboards to make it easy to see billing progress and resource consumption over the course of a week or month.
